Constructing a European Market Michelle Egan, 2001-06-14 Efforts to tackle the trade impeding effects of divergent standards and regulations are at the core of European economic relations This volume draws on literature from several disciplines to develop a comprehensive account of the regulatory strategies and institutional arrangements adopted by the EU in promoting the single market in goods It provides a historical overview and detailed cases studies of the various policy initiatives that have altered the boundaries between the public and private sector in fostering market integration Tackling interstate barriers to trade has relied heavily on European law to shape the framework of relations between states and trade liberalization has been facilitated by legal rulings resolving territorial conflicts over regulatory jurisdiction and authority The European Court of Justice has actively shaped markets acting as a free trade umpire in balancing the goals of market liberalization and market regulation while fostering market compliance Although markets are absolutely dependent on public authority the institutional innovation of the EU has been to use the private sector in an ancillary role to the state By delegating responsibility to set standards for market access the EU has chosen to draw on the resources of private actors resulting in a system of governance that is a distinctive hybrid model of regulation composed of state and non state actors Though the outsourcing of public sector regulatory activity was expected to be more effective than the process of regulatory harmonization progress has been difficult The current deficit in setting standards for European wide market access raises concerns about the efficiency and effectiveness of such a regulatory regime Egan provides a detailed evaluation of that process highlighting regulatory gaps in the single market and the need to focus not only on the process of market integration but also its outcome and impact on European business Comparisons with American efforts to create a national market are made throughout to demonstrate the difficulties of constructing and maintaining a single market American and European efforts to devise a uniform market for commerce and trade have involved both public and private authorities though with different degrees of coordination and centralization as many of the strategies undertaken by the EU echo earlier American market building efforts
