The Silver Market Phenomenon Florian Kohlbacher, Cornelius Herstatt, 2010-11-01 The current shift in demographics, aging and shrinking populations in many countries around the world, presents a major challenge to companies and societies alike. One particularly essential implication is the emergence and constant growth of the so-called graying market or silver market, the market segment more or less broadly defined as those people aged 50 and older. Increasing in number and share of the total population while at the same time being relatively well off, this market segment can be seen as very attractive and promising, although still very underdeveloped in terms of product and service offerings. This book offers a thorough and up-to-date analysis of the challenges and opportunities in leveraging innovation, technology, product development, and marketing for older consumers and employees. Key lessons are drawn from a variety of industries and countries, including the lead market, Japan.

Human-Computer Interaction Peter Forbrig, Fabio Paternó, Annelise Mark Pejtersen, 2010-08-23 The IFIP World Computer Congress WCC is one of the most important conferences in the area of computer science at the worldwide level, and it has a federated structure which takes into account the rapidly growing and expanding interests in this area. Informatics is rapidly changing and becoming more and more connected to a number of human and social science disciplines. Human computer interaction is now a mature and still dynamically evolving part of this area, which is represented in IFIP by the Technical Committee 13 on HCI. In this WCC edition, it was interesting and useful to have again a Symposium on Human Computer Interaction in order to present and discuss a number of contributions in this field. There has been increasing awareness among designers of interactive systems of the importance of designing for usability, but we are still far from having products that are really usable, and usability can mean different things depending on the application domain. We are all aware that too many users of current technology often feel frustrated because computer systems are not compatible with their abilities and needs in existing work practices. As designers of tomorrow's technology, we have the responsibility of creating computer artifacts that would permit better user experience with the various computing devices so that users may enjoy more satisfying experiences with information and communications technologies.

Location Aware Apps for Tourism Cathal Greaney, 2012-09-19 This book demonstrates the usefulness of the modern smartphone for providing location-aware applications to the tourist as an end user. During the course of this book, it has been demonstrated that the modern smartphone has the accuracy and responsiveness required to provide excellent location-aware functionality to the tourist end user. The GPS section outlines how a developer can leverage this functionality to make apps that use close-quarter location positioning to help the average tourist in a host of different ways. It has also been demonstrated that Bluetooth and other technologies such as QR coding are

effective at providing location aware functionality in situations where GNSS GPS is ineffective such as in indoor environments Lastly the book outlines how an engineer could provide augmented location services when GPS is not available by using the RSSI signal from Bluetooth devices Sams Teach Yourself Mac OS X Leopard All in One Robyn Ness,John Ray,2003-12-11 You ve got a Mac You ve got Leopard And you ve got iLife Safari Mail iChat and all the rest Now all you need to do is figure out how to get them to work together so that you can stop thinking about your computer and start thinking about getting things done having fun and enjoying everything your Mac has to offer This one book is your answer the answer to any questions you might have today and the answer to all the questions about Leopard and your Mac that you re likely to have in the future Find out how to Get the most enjoyment out of iLife Find files and documents with Spotlight Use QuickTime and DVD Player Use Windows software on Intel Macs Work with peripheral devices Surf the Web with Safari Send email with Mail Collaborate via iChat Share your screen files and computer securely Recover from crashes Back up and restore files with Time Machine **Daily Graphic** Yaw Boadu-Ayeboafah,2005-01-13 **Daily Graphic** Ransford Tetteh,2010-02-02 *The Mirror* E.N.O.
