Exploring Best Practice For Home Warranty System (Penerbit USM) Sufardy Sibly, Abdul Aziz Hussin, Nor' Aini Yusof, 2019-08-09 Exploring Best Practice for Home Warranty System Housing industry has been one of the major contributors towards the Malaysian economic growth in terms of its affiliation with other industries involving public and private sectors. Additionally, the housing industry also provides mass employment opportunities. With the industry competitively expanding locally and globally, the industry does not escape from problems such as abandoned projects, late delivery, fraud, and defects. Due to housing demands, there are different kinds of housing guarantee and warranty schemes being offered in various countries in order to entice the buyers besides promoting quality homes. The aim of this book is to highlight a few criteria that can be considered as the best practices of the home or housing warranty system. These criteria resulted from the detailed researches and comparison from related literatures and also from current practices in terms of its legislative control. Political and economic influences the knowledge process and the design. By combining all the features and the best practices, this book proposes a framework to act as the guideline to determine whether the home warranty has been applied. Finally, this book provides the reason for having a proper home warranty system and its benefits to the house buyers in promoting safe, quality, affordable, and sustainable products.

[A Practitioner's Guide to European Patent Law](#) Paul England, 2022-09-08 This new edition is a comprehensive and practical guide to European patent law, a *ius commune*. The book highlights the areas of consistency and difference between the most influential European patent law jurisdictions: the European Patent Office, England and Wales, France, Germany, and the Netherlands. The book also draws insights from further afield, with contributions from other very active patent jurisdictions including Italy, Sweden, Denmark, and Switzerland. Uniquely, the book addresses European patent law by subject-matter area, assessing the key national and EPO approaches together rather than nation by nation. Each chapter outlines the common ground between the national approaches and provides a guide for the possible application of European patent law in national courts and the UPC in the future. In addition to featuring content on new countries, the second edition includes new chapters dedicated to the substantive aspects of FRAND declarations and evidence. There is also an expanded commentary on construction, including common terms used in patent claims. A must-read for anyone working in the field of European patent law.
