Management and gender in higher education Pat O'Connor, 2015-11-01 This book is a definitive examination of higher education locating it in a wider neo liberal context involving the state and the market with a specific focus on recent higher policy and on the elite group of senior managers in universities Written in a clear accessible style it provides an in depth analysis of university structures cultures and practices at senior management level Despite the managerialist rhetoric of accountability we see structures where access to power is through the Presidents blessing very much as in a medieval court We see a culture that is less than comfortable with the presence of women and which in its narratives stereotypes and interactions exemplifies to a rather nineteenth century view of women Sites and sources of change are also identified In a global context where diversity is crucial to innovation it challenges us to critically reflect on management and on higher education
