Sustainable Diets Barbara Burlingame, Sandro Dernini, 2018-12-10 This book takes a transdisciplinary approach and considers multisectoral actions integrating health, agriculture, environment, economy, and socio-cultural issues to comprehensively explore the topic of sustainable diets. Consideration is given to the multi-dimensional nature of diets and food systems, and the book explores the challenging issues connecting food security and nutrition to sustainability, culture, tradition, and a broader range of scientific topics. The first section, Grand Challenges, chapters 1-9 positions sustainable diets in the multi-perspective context of food systems. Within the current international debate, it introduces some overarching wicked problems resistant to resolution in spite of the dire consequences of inaction. The chapters cover multi-sectoral policy, public health, sustainable food systems, climate change, biodiversity loss, agro-ecology, indigenous peoples, the role of cities, and food and waste. The contributions in the second section, Qualitative and Quantitative Approaches, chapters 10-17 discuss the topic of sustainable diets from different cultural, sectoral, and disciplinary angles. The issues are analysed with data and methods derived from social sciences, clinical sciences, and experimental sciences. Perspectives and solutions with evidence are presented to underpin policies and interventions. The last section, Moving Forward, chapters 18-29 deals with selected innovations, initiatives, projects, case studies, and programmes enhancing sustainable diets by linking nutrition to food systems.
