November 2014 Agriculture Memorandum:

The Future of Philippine Agriculture under a Changing Climate Mark W. Rosegrant, Mercedita A. Sombilla, 2018-11-30

The Philippine economy has grown rapidly since 2010 but despite this growth poverty and inequality remain high. Two thirds of the poor live in rural areas and the weak performance of the agriculture sector has contributed to the slow improvement in livelihoods. The challenge for agriculture will further increase with climate change posing a growing threat to the sector. But agricultural transformation to spur sustained growth and reduce poverty is still possible under climate change with aggressive institutional reforms and implementation of the right mix of policies and programmes. The identification of the suitable policy and programme combination requires an accurate assessment of the key drivers of agricultural growth and food security, the impacts of climate change on agriculture and the overall economy and the effectiveness of policies for adaptation and growth. This book addresses these big issues focusing on enhancing the adaptation capacity of the Philippine agriculture sector. It is designed to provide a much needed base of knowledge and menu of policy options to support decision and policymaking on agriculture, climate change and food security. The volume uses newly generated data modelling outputs and innovative analyses to provide a scientific basis for a variety of adaptation measures under different sets of climate change scenarios to guide decision makers in strategic planning and policy formulation. As we have actually experienced in Leyte, an island province in the Visayas where Super Typhoon Yolanda Haiyan struck, disasters caused by natural hazards could completely negate economic gains, devastate families and shatter dreams. Our greatest challenge is to make ourselves better prepared for and be more resilient to such disasters. Natural hazards need not always lead to loss of so many lives and properties. This book shows us ways and provides tools to draw up climate change and socioeconomic scenarios at the regional and provincial levels, allowing us to identify strategies for mitigating climate change risks. Ernesto M. Pernia, Secretary of Socioeconomic Planning, National Economic and Development Authority, Philippines. This book by top Philippine researchers combines state of the art biophysical and economic modeling of climate impacts and adaptation policies with in depth synthesis of agriculture, natural resources, climate trends and policies. It provides a comprehensive assessment of climate change impacts on agriculture and the broader economy to provide important insights for Philippine policymakers. Dr. Cynthia Rosenzweig, Head, Climate Impacts Group, NASA Goddard Institute for Space Studies and Co-Founder of the Agricultural Model Inter-comparison and Improvement Project (AgMIP).

Food Security Governance

Nora McKeon, 2014-12-17. This book fills a gap in the literature by setting food security in the context of evolving global food governance. Today's food system generates hunger alongside of food waste, burgeoning health problems, massive greenhouse gas emissions. Applying food system analysis to review how the international community has addressed food issues since World War II, this book proceeds to explain how actors link up in corporate global food chains and in the local food systems that feed most of the world's population. It unpacks relevant paradigms from productivism to food sovereignty and highlights

the significance of adopting a rights based approach to solving food problems The author describes how communities around the world are protecting their access to resources and building better ways of producing and accessing food and discusses the reformed Committee on World Food Security a uniquely inclusive global policy forum and how it could be supportive of efforts from the base The book concludes by identifying terrains on which work is needed to adapt the practice of the democratic public sphere and accountable governance to a global dimension and extend its authority to the world of markets and corporations This book will be of interest to students of food security global governance development studies and critical security studies in general

Barons Austin Frerick, 2024-03-26 Best Books of 2024 Frerick's prose throughout is both direct and masterfully controlled with every point supported by extensive references and notes This is no alarmist screed but rather a careful systematic and utterly damning demolition job an exquisitely informed exposé A genuinely revelatory look at mass food production in the United States Kirkus Reviews starred In this eye opening debut study Frerick an agricultural policy fellow at Yale University reveals the ill gained stranglehold that a handful of companies have on America's food economy It's a disquieting critique of private monopolization of public necessities Publishers Weekly starred *Barons* is the story of seven corporate titans their rise to power and the consequences for everyone else Take Mike McCloskey Chairman of Fair Oaks Farms In a few short decades he went from managing a modest dairy herd to running the Disneyland of agriculture where school children ride trams through mechanized warehouses filled with tens of thousands of cows that never see the light of day What was the key to his success Hard work and exceptional business savvy Maybe But more than anything else Mike benefitted from deregulation of the American food industry a phenomenon that has consolidated wealth in the hands of select tycoons and along the way hollowed out the nation's rural towns and local businesses Along with Mike McCloskey readers will meet a secretive German family that took over the global coffee industry in less than a decade relying on wealth traced back to the Nazis to gobble up countless independent roasters They will discover how a small grain business transformed itself into an empire bigger than Koch Industries with ample help from taxpayer dollars And they will learn that in the food business crime really does pay especially when you can bribe and then double cross the president of Brazil These and the other stories in this book are simply examples of the monopolies and ubiquitous corruption that today define American food The tycoons profiled in these pages are hardly unique many other companies have manipulated our lax laws and failed policies for their own benefit to the detriment of our neighborhoods livelihoods and our democracy itself *Barons* paints a stark portrait of the consequences of corporate consolidation but it also shows we can choose a different path A fair healthy and prosperous food industry is possible if we take back power from the barons who have robbed us of it

withdrawal of quantitative easing and its effect on the long end of U S interest rates is assumed to follow a relatively slow orderly trajectory If however the taper is met with an abrupt market adjustment capital inflows could weaken sharply placing renewed stress on vulnerable developing economies In a scenario where long term interest rates rise rapidly by 100 basis points capital inflows could decline by as much as 50 percent for several quarters

The Rise and Decline and Rise of China MISTRA MISTRA,2015-05-10 The Rise and Decline and Rise of China Searching for an Organising Philosophy represents a new and promising approach to Africa China relations What is most impressive is that it is an encounter between African and Chinese thought but this encounter is not just a set of stale comparisons of philosophical beliefs This study places the concepts and attitudes in both China and Africa in their socio political contexts in an attempt to provide a sophisticated sensitive and usable history This attempt yields dividends especially for the primary audience of Africans as it gives a way of learning from the vast history of Chinese experience without reducing African experience to insignificance or irrelevance as has happened so often in dialogues between Africa and the West This book will be of interest to anyone from within Africa interested in engaging with China as a complex and nuanced place a place of challenge creativity and opportunity
