

Lab Using the Scientific Method

Purpose: SC.912.N.1.1 - To conduct observations, create a hypothesis, design an investigation, analyze that data, and draw a conclusion.

Materials

- Ruler

Form a Question (In this experiment, the question is being given to you. As you come across things, be inquisitive and test out those questions in your own life)

Does having big feet mean you will have big hands?

Form a Hypothesis (written as an **"If..... then.....because..."** statement)

I believe that big feet do not mean big hands.

List Your Variables:

Independent Variable (The variable that is affecting the dependent variable)	Feet and Hands
Dependent Variable (The variable that is being measured and recorded)	The measurement of how long your hand or feet are
Constant Variables (The variables that stay the same between your two groups)	We are only doing 7th-period teenagers Feet and Hands

Conduct an Experiment (Write several sentences outlining the steps you will take to test your research question.)

Steps:

1. Measure the hands and feet of at least 5 people in the class in class in **centimeters**.
 - a. Hands will be measured from the bend in the wrist to the end of the middle finger.
 - b. Feet will be measured from heel to big toe.

Person's initials	Hand measurement in cm	Foot measurement in cm

Instructor's Manual for the Laboratory Manual for Starr and Taggart's Biology : The Unity and Diversity of Life and Starr's Biology Concepts and Applications James W. [et. al]. Perry, 2002 Multiple Solution Methods for Teaching Science in the Classroom Stephen DeMeo, 2008 For the first time in science education the subject of multiple solution methods is explored in book form While a multiple method teaching approach is utilized extensively in math education there are very few journal articles and no texts written on this topic in science Teaching multiple methods to science students in order to solve quantitative word problems is important for two reasons First it challenges the practice by teachers that one specific method should be used when solving problems Secondly it calls into question the belief that multiple methods would confuse students and retard their learning Using a case study approach and informed by research conducted by the author this book claims that providing students with a choice of methods as well as requiring additional methods as a way to validate results can be beneficial to student learning A close reading of the literature reveals that time spent on elucidating concepts rather than on algorithmic methodologies is a critical issue when trying to have students solve problems with understanding It is argued that conceptual understanding can be enhanced through the use of multiple methods in an environment where students can compare evaluate and verbally discuss competing methodologies through the facilitation of the instructor This book focuses on two very useful methods proportional reasoning PR and dimensional analysis DA These two methods are important because they can be used to solve a large number of problems in all of the four academic sciences biology chemistry physics and earth science This book concludes with a plan to integrate DA and PR into the academic science curriculum starting in late elementary school through to the introductory college level A challenge is presented to teachers as well as to textbook writers who rely on the single method paradigm to consider an alternative way to teach scientific problem solving

Yung,2006-02-03 Fairness and Fear I was startled at the subtitle of the book when I first heard it Our series has some imaginative titles but none so evocative as this one But fear and fairness capture much of teacher thinking about assessment Indeed teachers struggle to be fair with students certainly concerned and often fearful of failures to be fair and repercussions that teachers can face as a result Then there is the fearful enterprise of imposed assessment regimes that many teachers face Dr Yung s book allows us to hear from the teachers on these concerns this is no top down policy statement His account is readable and highly instructive and I hope that copies will find their way to the desks of many school administrators and policy personnel We are indeed pleased to release this volume William W Cobern Book Series Editor 2000 2005 Foreword by Peter Fensham Two things are very clear to me about formal educational systems What is assessed in these systems determines what teachers and students recognize as knowledge of worth Teachers in general are conscientious in doing their best to ensure that their students will learn this knowledge of worth well Science has now been widely acknowledged to be a core or key subject in the overall curriculum of schooling at all levels *Research in Education* ,1974 **Bulletin** ,1918
