Proceedings of the 8th International Conference on Computational Science and Technology Rayner Alfred, Yuto Lim, 2022-03-25 This book gathers the proceedings of the Seventh International Conference on Computational Science and Technology ICCST 2021 held in Labuan Malaysia on 28 29 August 2021 The respective contributions offer practitioners and researchers a range of new computational techniques and solutions identify emerging issues and outline future research directions while also showing them how to apply the latest large scale high performance computational methods Coronal Magnetometry Sarah E. Gibson, Laurel A. Rachmeler, Stephen M. White, 2017-07-11 Magnetism defines the complex and

dynamic solar corona It determines the magnetic loop structure that dominates images of the corona and stores the energy necessary to drive coronal eruptive phenomena and flare explosions At great heights the corona transitions into the ever outflowing solar wind whose speed and three dimensional morphology are controlled by the global coronal magnetic field Coronal magnetism is thus at the heart of any understanding of the nature of the corona and essential for predictive capability of how the Sun affects the Earth Coronal magnetometry is a subject that requires a concerted effort to draw together the different strands of research happening around the world Each method provides some information about the field but none of them can be used to determine the full 3D field structure in the full volume of the corona Thus we need to combine them to understand the full picture The purpose of this Frontiers Research Topic on Coronal Magnetometry is to provide a forum for comparing and coordinating these research methods and for discussing future opportunities

Plant Flow Measurement and Control Handbook Swapan Basu,2018-08-22 Plant Flow Measurement and Control Handbook is a comprehensive reference source for practicing engineers in the field of instrumentation and controls It covers many practical topics such as installation maintenance and potential issues giving an overview of available techniques along with recommendations for application In addition it covers available flow sensors such as automation and control The author brings his 35 years of experience in working in instrumentation and control within the industry to this title with a focus on fluid flow measurement its importance in plant design and the appropriate control of processes The book provides a good balance between practical issues and theory and is fully supported with industry case studies and a high level of illustrations to assist learning It is unique in its coverage of multiphase flow solid flow process connection to the plant flow computation and control Readers will not only further understand design but they will also further comprehend integration tactics that can be applied to the plant through a step by step design process that goes from installation to operation Provides specification sheets engineering drawings calibration procedures and installation practices for each type of measurement Presents the correct flow meter that is suitable for a particular application Includes a selection table and step by step guide to help users make the best decision Cover examples and applications from engineering practice that will aid in understanding and application

Control Applications in Modern Power Systems Jitendra Kumar,Manoj Tripathy,Premalata Jena,2022-05-27 The volume contains peer reviewed proceedings of EPREC 2021 with a focus on control applications in the modern power system The book includes original research and case studies that present recent developments in the control system especially load frequency control wide area monitoring control instrumentation optimization intelligent control energy management system SCADA systems etc The book will be a valuable reference guide for beginners researchers and professionals interested in advancements in the control system

Highlands to Deserts Michael Tyquin,2018-09-05 Highlands to Deserts is the story of a small Australian Army engineering unit determined to use more than bricks and bridges to make a difference not only to Australian Army units but to indigenous communities both within Australia and overseas The

19th Chief Engineer Works was raised in 1963 as the Army's premier engineering consultant its purpose to plan design and oversee the construction of barracks and training facilities in the New Guinea highlands However the men of the unit demonstrated vision far beyond their limited brief reaching into local communities and building relationships with tribesmen that were to prove strong and enduring From the wilds of New Guinea the unit extended its reach to the remote communities of outback Australia designing infrastructure that reflected local needs The engineers engaged with indigenous townships cementing relationships as they planned essential infrastructure their sole aim to make a difference to local lives The unit's military remit ranged from designing bridges and wharfs to training facilities and even churches The story of the 19th Chief Engineer Works its people and its achievements deserves to be far better known and Highlands to Deserts provides rich portrayals of the characters and the trials and tribulations that signpost their history These are men and women who have invested in communities large and small near and far seeking to improve the daily lives of soldiers and indigenous peoples Having worked quietly in the background for 55 years it is now time to tell the story of the 19th Chief Engineer Works

Law and Judicial Dialogue on the Return of Irregular Migrants from the European Union Madalina Moraru,Galina Cornelisse,Philippe De Bruycker,2020-08-06 This volume examines the implementation of the Return Directive from the perspective of judicial dialogue While the role of judges has been widely addressed in European asylum law and EU law more generally their role in EU return policy has hitherto remained under explored This volume addresses the interaction and dialogue between domestic judiciaries and European courts in the implementation of European return policy The book brings together leading authors from various backgrounds including legal scholars judges and practitioners This allows the collection to offer theoretical and practical perspectives on important questions regarding the regulation of irregular migration in Europe such as what constitutes inadequate implementation of the Directive and under which conditions can judicial dialogue solve it How can judges ensure that the right balance is struck between effective return procedures and fundamental rights Why do we see different patterns of judicial dialogue in the Member States when it comes to particular questions of return policy for example regarding the use of detention These questions are more timely than ever given the shifting public discourse on immigration and the growing political backlash against immigration courts This book will be essential reading for all scholars and practitioners in the fields of immigration law and policy EU law and public law

HC 902 - The Work of the Immigration Directorates: Calais Great Britain.

Parliament. House of Commons. Home Affairs Committee, 2015 Calais is the closest entry point to the UK from Europe with frequent ferry services to Dover the Eurotunnel Shuttle service to Folkestone and direct passenger trains to London St Pancras About 10 million passengers and about 89 billion worth of UK trade pass through the port of Calais every year A further 20 million passengers pass through the tunnel on Eurostar or the Shuttle Most of the traffic is freight Most of the passengers are British citizens on leisure trips The growing number and living conditions of migrants in Calais and the enhanced security measures brought in to counter them have affected the residents of Calais the reputation of the port of Calais and the ease with which trade and traffic can pass between Britain and the Continent The number of migrants at Calais has increased over 2014 from an estimated 1 300 in September to about 2 500 by the end of October The majority are from countries that have been affected by war or civil unrest Most are men and from Somalia Sudan Eritrea and Syria in 2013 Syria overtook Afghanistan as the top country of origin of asylum seekers in the world Some of the migrants live in squats and small camps in the town of Calais but most live in makeshift tents made out of plastic sheets and canvas poorly constructed located in empty industrial sites or woodland The camps are not permanent and Calais is not the final destination but a staging post for migrants wishing to enter the UK illegally The UK cannot ignore the issues around Calais While security in France is the responsibility of the French authorities the UK operates juxtaposed border controls in Calais and Coquelles These juxtaposed controls enable all border administration for entry to the UK to take place before passengers and vehicles leave France Efficient management of queues and the ability to deliver on time are important both to avoid disruption to carriers timetables and to avoid the excessive build up of traffic on the surrounding road network As well as ensuring the efficient and timely processing of travellers and freight the border controls are needed to ensure the integrity of the UK border

The Airline Revolution Gordon Mills, 2016-07-15 When starting new airlines in response to government deregulation entrepreneurs in the U S and Europe reduced some traditional service qualities to reduce costs concentrated on non stop services between city pairs not already so connected improved on time performance and offered low fares to win leisure travelers from the incumbents and to encourage more travel In recent developments some of the new airlines have offered optional extras at higher fares to attract business travelers and entered major routes alongside the legacy carriers Within both the U S and Europe deregulation removed most geographical barriers to expansion by short haul airlines Later limited deregulation spread to other world regions where many short haul routes connect city pairs in different countries and where governments have retained traditional two country mechanisms restricting who may fly To gain access to domestic routes in other countries some new airlines are setting up affiliate companies in neighboring countries with each company legally controlled in the country of domicile With air travel growing strongly especially in Asia a common result is intense but potentially short lived competition on major routes The recent developments give clear signposts to likely mid term outcomes and make this an opportune time to report on the new airline scene The Airline Revolution will provide valuable economic analysis of this climate to students airline professionals advancing to senior positions public servants and others who provide advice to governments

The Cameron-Clegg Coalition and Britain's Role in the World Timothy J. Oliver, 2021-09-15 This is the first in depth study of the foreign and defence policies of the Coalition a government that saw the Conservatives restored to power for the first time since the Iraq War and the Liberal Democrats enter government for the first time It explores the idea of Britain as a Great Power since 1945 to show how the Coalition's policies fitted into wider historical understandings of Britain's role in the world Drawing on a range of evidence from the time of the Coalition it shows that this

period was one of continued change in British foreign policy The Coalition conducted the first strategic defence review since 1998 significantly reduced the funding allocations for defence and foreign affairs raised overseas aid spending to record levels engaged in overseas military action in two sovereign states and were denied a chance to participate in another as well as a wide array of other policies This book argues that evaluating these events and the historical background of the Coalition is critical to understanding the current crises gripping British politics
