Anne Marshall,Jennifer E. several decades. However, it still faces major challenges in the education sector and these challenges undermine the country's inclusive growth goal and its ambition to become a competitive upper middle income country. The authors of Sri Lanka Education Sector Assessment: Achievements, Challenges and Policy Options offer a thorough review of Sri Lanka's education sector from early childhood education through higher education. With this book, they attempt to answer three questions: How is Sri Lanka's education system performing, especially with respect to participation rates, learning outcomes, and labor market outcomes? How can the country address the challenges at each stage of the education process, taking into account both country and international experience and also best practices? Which policy actions should Sri Lanka make a priority for the short and medium term? The authors identify the most critical constraints on performance and present strategic priorities and policy options to address them. To attain inclusive growth and become globally competitive, Sri Lanka needs to embark on integrated reforms across all levels of education. These reforms must address both short-term skill shortages and long-term productivity. As Sri Lanka moves up the development ladder, the priorities of primary, secondary, and postsecondary education must be aligned to meet the increasingly complex education and skill requirements.

Handbook of Education Policy Research Lora Cohen-Vogel, Peter Youngs, Janelle Scott, 2025-07-17. The second edition of the Handbook of Education Policy Research, the largest volume published in AERA's history, addresses a variety of policy and contextual issues in early childhood, K-12, and postsecondary education that have received extensive empirical attention during the past 15 years. With the pandemic and social turmoil as a backdrop, the editors build on the breadth and depth of the first edition while expanding the scope of the project to include subjects, methods, theories, and analyses that have contributed powerfully to the study of education policy and politics in the 2010s and 2020s. The field has become more comprehensive and inclusive, and the authors represent a diversity of racial, ethnic, and gender identities and intellectual and disciplinary orientations. Most chapters come from multiple authors, reflecting the multi-sourced development of research in education policy since the first volume was published. This compilation consists of 70 chapters and nine commentaries that map past, present, and future directions of the field and richly attend to critical issues of interest to students, researchers, policy makers, and practitioners.

Handbook of Field Experiments Esther Duflo, Abhijit Banerjee, 2017-03-21. The new volume includes sections on field experiments in education in developing countries, how to design social protection programs, a section on how to combat poverty, and updates on data relating to the impact and determinants of health levels in low-income countries. Separating itself from circumscribed debates of specialists, this volume surpasses the many journal articles and narrowly defined books written by practitioners. This ongoing series will be of particular interest to scholars working with experimental methods. Users will find results from politics, education, and more. Balances methodological insights with analyses of principal findings and suggestions for further research. Appeals broadly to social scientists seeking

to develop an expertise in field experiments Written in a language that is accessible to graduate students and non specialist economists
