Federal Register ,1990-10 **Graduate Work in Mathematics in Universities and in Other Institutions of Like Grade in the United States** Arthur Coleman Monahan, George Drayton Strayer, International Commission on the Teaching of Mathematics, William Carl Ruediger, Wilson, Louis N., 1911 *The children's plan* Great Britain: Department for Children, Schools and Families, 2007-12-11 The Children's Plan conceived after consultation with both parents and professionals sets out the Government's ambitions for improving children and young people's lives over the next decade The six strategic objectives are to secure the health and wellbeing of children and young

people safeguard the young and vulnerable achieve world class standards close the gap in educational achievement for children from disadvantaged backgrounds ensuring young people are participating in achieving their potential to 18 and beyond and keeping children and young people on the path to success The ambition depends on all children s services working together at the local level and the final chapter looks at the systems which are needed for this to happen An Age of Accountability John L. Rury, 2023-10-13 An Age of Accountability highlights the role of test based accountability as a policy framework in American education from 1970 to 2020 For more than half a century the quest to hold schools and educators accountable for academic achievement has relied almost exclusively on standardized assessment The theory of change embedded in almost all test based accountability programs held that assessment with stipulated consequences could lead to major improvements in schools This was accomplished politically by proclaiming lofty goals of attaining universal proficiency and closing achievement gaps which repeatedly failed to materialize But even after very clear disappointments no other policy framework has emerged to challenge its hegemony The American public today has little confidence in institutions to improve the quality of goods and services they provide especially in the public sector As a consequence many Americans continue to believe that accountability remains a vital necessity even if educators and policy scholars disagree
