American politics is an indicator that all is not well in our nation's schools. Teaching Civics in Unstable Times: Guidelines for Defining We in American Democracy offers a fresh, expansive view of what civic education can look like in K-12 classrooms and presents three strategies to help teachers, curriculum writers, and administrators turn their schools into laboratories for democracy that train young people for the moral and intellectual challenges of democratic citizenship. This book defines democracy as a way of life that is characterized by frequent public engagement, stubborn open-mindedness, and rigorous debate. Our democratic government depends on our citizens leading a democratic life, and civic education's chief priority is to teach young people how to do so. Civic curriculum has spent decades obsessing over names and dates that fail to give students a sense of their vaunted place in our governing system. This book presents three strategies for teaching civics that invest young people in our shared grand experiment in self-government and prepares them to lead our nation towards a politics that is more compassionate, inclusive, and inspired.

*Citizenship* Diana L. Reische, American Association of School Administrators, 1987. The central question of this book is how can schools that are already overloaded with assignments from society find the time and techniques to produce effective citizens. Six chapters examine this problem. Chapter 1 documents the need for civic education and the problems related to providing an effective civic education. Chapter 2 explores the many different interpretations of citizenship education and determines that it stems from all educational experiences. A discussion of the different content areas and approaches associated with citizenship education is presented in chapter 3. State mandates and the place of citizenship education in the elementary, junior high, and high school curricula are outlined in chapter 4. Methods of providing hands-on experience to students through youth participation programs are outlined in chapter 5. The concluding chapter discusses ways to use the bicentennial celebration to revitalize citizenship education. A five-page list of references is provided, and the book concludes with 21 recommendations for strengthening civic education.

SM *Civics for the World to Come: Committing to Democracy in Every Classroom (Equity and Social Justice in Education)* Nicole Mirra, Antero Garcia, 2023-07-25. Help students use their voices to build an equitable and just society. Years of political violence and protests against injustice have revived interest in teaching civics in schools. The problem: Civic education as it currently exists privileges systems, not students. It promotes incremental change within a broken democracy rather than responding to the youth-led movements that call for the abolition of inequitable social structures. What will it take to prepare young people for the just future they are fighting for? *Civics for the World to Come* offers educators a framework for designing the critical civic education that our students deserve. Synthesizing perspectives on democratic life from critical race theory, ethnic studies, Afrofuturism, and critical literacy, the book presents key practices for cultivating youth civic agency grounded in equity and justice. The authors explore five world-building civic skills: Inquiry, Storytelling, Imagination, Networking, and Advocacy, and introduce readers to real learning communities where students and educators are transforming themselves and society.
