Kielhofner's Research in

Occupational Therapy Renee R Taylor, 2017-01-05 With an international team of expert contributors Renee Taylor carries on Gary Kielhofner's innovative work in the 2nd Edition of his comprehensive research methodologies text. This guide bridges the gap between theorists and practitioners. It focuses on the relevance and logic of research to provide a practical demystified approach to conducting applied research in the field for graduate students and clinicians. You'll begin with an introduction to the nature and scope of research and its place in OT and then explore research designs, measurements, and statistical analysis for qualitative, quantitative, and mixed studies. You'll examine the steps and procedures required to conduct research and how research can be used to shape professional practice and improve patient care.

Occupational Therapy in Community Mental Health Jennifer Michetti, 2016 Community mental health teams (CMHTs) commonly include workers with different educational backgrounds in dual roles including generalist (e.g., case manager) and specialist duties (e.g., occupational therapist). Culverhouse Parker, 2001 Little has been done to examine how occupational therapists (OTs) working on CMHTs understand their professional roles in relation to existing governing documents. Methods included a document review and content analysis identifying the role on paper compared and contrasted against individual interviews highlighting OTs' roles in practice. The study finds direction lacking from governing texts related to occupational therapy on CMHTs. OT practices are informed largely by previous student and work experiences, client needs, individual therapist skills, and team makeup. OTs find themselves experiencing seemingly opposing views (e.g., wide scope of practice vs. narrow scope all alone in a crowd, I do it all vs. it's all teamwork). The lens through which one chooses to view one's practice influences one's perception of how much work is designated as occupational therapy specific. Priority areas for improvement: 1. successfully navigating the dual role, 2. enabling more evidence-informed practice, 3. addressing role clarity, and 4. supporting clinical student placements on CMHTs.
