**Economics as Rhetoric** Anne Isla, 2024-07-26 Bernard Maris was killed in Paris on January 7 2015 during the terrorist attack against the satirical magazine Charlie Hebdo He remains one of the most original intellectuals of contemporary France but despite being a uniquely original heterodox thinker his international reputation has been compromised by the fact that his writings are inaccessible to non French speakers This book remedies that By providing an overview of Bernard Maris life and intellectual trajectory as well as an English translation of an anthology of his most relevant writings this volume

provides the international audience for the first time ever the chance to know and understand the contribution of this major heterodox economist An outstanding and atypical figure in economic thought and a virulent critic of mainstream dominant economics he was also an all round actor and thinker of his time Through rigorous reasoning he questioned the notion of well being which he argued is too often conflated with having more Enslavement by work or the endless destructive accumulation of natural wealth is also inherent to the capitalist system Probably his most original contribution is his epistemological reflection on the very nature of economics and his appraisal of this discipline as a form of rhetoric This book will be of great interest to readers in heterodox economics economic methodology epistemology and French literature and culture more broadly

**Microfoundations of Evolutionary Economics**

Yoshinori Shiozawa, Masashi Morioka, Kazuhisa Taniguchi, 2019-06-27 This book provides for the first time the microfoundations of evolutionary economics enabling the reader to grasp a new framework for economic analysis that is compatible with evolutionary processes Any independent approach to economics must include a value theory or price theory and price and quantity adjustment processes Evolutionary economics has rightly and successfully concentrated its efforts on explaining evolutionary processes in technology and institutions However it does not have its own value theory and is not capable of explaining the workings of everyday economics processes in which any evolutionary process would take place Our

point of departure is the addition of myopic agents with severely limited rational and forecasting capacities in stark contrast to mainstream economics We show how myopic agents in a complex world can produce a stable price system and demonstrate how they can adjust their production to changing demand flows Agents behave without any knowledge of the overall process and they generate a stable economy as large as the global network of exchanges This is the true miracle of the market mechanism In contrast to mainstream general equilibrium theory this miracle can be explained without the need for an auctioneer or infinitely rational agents Thanks to this book evolutionary economics can now claim to be an independent approach to economics that can completely replace mainstream neoclassical economics
