Political Game Theory An Introduction Analytical Methods For Social Research:

Political Game Theory McCarty Nolan M Meirowitz Adam, Nolan M. McCarty, Adam Meirowitz, 2014-05-14 Political Game Theory is a self contained introduction to game theory and its applications to political science *Data Analysis Using Regression and Multilevel/Hierarchical Models* Andrew Gelman, Jennifer Hill, 2007 This book first published in 2007 is for the applied researcher performing data analysis using linear and nonlinear regression and multilevel models Time Series Analysis for the Social Sciences Janet M. Box-Steffensmeier, John R. Freeman, Matthew P. Hitt, Jon C. W. Pevehouse, 2014-12-22 Time series or longitudinal data are ubiquitous in the social sciences Unfortunately analysts often treat the time series properties of their data as a nuisance rather than a substantively meaningful dynamic process to be modeled and interpreted Time Series Analysis for the Social Sciences provides accessible up to date instruction and examples of the core methods in time series econometrics Janet M Box Steffensmeier John R Freeman Jon C Pevehouse and Matthew P Hitt cover a wide range of topics including ARIMA models time series regression unit root diagnosis vector autoregressive models error correction models intervention models fractional integration ARCH models structural breaks and forecasting This book is aimed at researchers and graduate students who have taken at least one course in multivariate regression Examples are drawn from several areas of social science including political behavior elections international conflict criminology and comparative political economy Maximum Likelihood for Social Science Michael D. Ward, John S. Ahlquist, 2018-11-15 This volume provides a practical introduction to the method of maximum likelihood as used in social science research Ward and Ahlquist focus on applied computation in R and use real social science data from actual published research Unique among books at this level it develops simulation based tools for model evaluation and selection alongside statistical inference The book covers standard models for categorical data as well as counts duration data and strategies for dealing with data missingness By working through examples math and code the authors build an understanding about the contexts in which maximum likelihood methods are useful and develop skills in translating mathematical statements into executable computer code Readers will not only be taught to use likelihood based tools and generate meaningful interpretations but they will also acquire a solid foundation for continued study of more advanced statistical techniques

Statistical Modeling and Inference for Social Science Sean Gailmard, 2014-06-09 Written specifically for graduate students and practitioners beginning social science research Statistical Modeling and Inference for Social Science covers the essential statistical tools models and theories that make up the social scientist s toolkit Assuming no prior knowledge of statistics this textbook introduces students to probability theory statistical inference and statistical modeling and emphasizes the connection between statistical procedures and social science theory Sean Gailmard develops core statistical theory as a set of tools to model and assess relationships between variables the primary aim of social scientists and demonstrates the ways in which social scientists express and test substantive theoretical arguments in various models Chapter exercises guide

students in applying concepts to data extending their grasp of core theoretical concepts Students will also gain the ability to create read and critique statistical applications in their fields of interest **Spatial Analysis for the Social Sciences**

David Darmofal,2015-11-12 This book shows how to model the spatial interactions between actors that are at the heart of the social sciences *Inferential Network Analysis* Skyler J. Cranmer,Bruce A. Desmarais,Jason W. Morgan,2020-11-19

Pioneering introduction of unprecedented breadth and scope to inferential and statistical methods for network analysis

Computational Social Science R. Michael Alvarez,2016-03-10 This book provides an overview of cutting edge approaches to computational social science **Counterfactuals and Causal Inference** Stephen L. Morgan,Christopher

Winship,2014-11-17 In this second edition of Counterfactuals and Causal Inference completely revised and expanded the essential features of the counterfactual approach to observational data analysis are presented with examples from the social demographic and health sciences Alternative estimation techniques are first introduced using both the potential outcome model and causal graphs after which conditioning techniques such as matching and regression are presented from a potential outcomes perspective For research scenarios in which important determinants of causal exposure are unobserved alternative techniques such as instrumental variable estimators longitudinal methods and estimation via causal mechanisms are then presented The importance of causal effect heterogeneity is stressed throughout the book and the need for deep causal explanation via mechanisms is discussed *Formal Models of Domestic Politics* Scott Gehlbach,2021-09-30 Formal Models of Domestic Politics offers a unified and accessible approach to canonical and important new models of politics Intended for political science and economics students who have already taken a course in game theory this new edition retains the widely appreciated pedagogic approach of the first edition Coverage has been expanded to include a new chapter on nondemocracy new material on valence and issue ownership dynamic veto and legislative bargaining delegation to leaders by imperfectly informed politicians and voter competence and numerous additional exercises Political economists comparativists and Americanists will all find models in the text central to their research interests This leading graduate textbook assumes no mathematical knowledge beyond basic calculus with an emphasis placed on clarity of presentation Political scientists will appreciate the simplification of economic environments to focus on the political logic of models economists will discover many important models published outside of their discipline and both instructors and students will value the classroom tested exercises This is a vital update to a classic text **Enabling the Iranian Gas Export Options**

Maximilian Kuhn,2014-01-17 Maximilian Kuhn investigates one of the most pressing yet neglected subjects in the field of global energy politics the integration of the Iranian gas market Possessing the world's second largest proven natural gas reserves Iran is a hypothetical energy giant in waiting Yet over three decades of internal divisions coupled with crippling international sanctions have left Iran unable to capitalize on its vast energy potential Increasing global demand for natural gas and a government in constant need of finding new sources of revenue to meet the needs of a fast growing population

should lead Iran to eventually become a large scale gas exporter How this could take place and what the implications for global gas markets would be are the central research questions tackled by this study The study allows a look beyond international politics Iranian political decision making investment laws and pipeline games Game Theory and Its Application to the Social Sciences United States. Department of State. External Research Staff,1964 *Regression and Other Stories* Andrew Gelman,Jennifer Hill,Aki Vehtari,2021 A practical approach to using regression and computation to solve real world problems of estimation prediction and causal inference Social Science Methodology John Gerring,2001-09-10 This book offers a one volume introduction to social science methodology relevant to the disciplines of anthropology economics history political science psychology and sociology It is written for beginning students long time practitioners and methodologists and applies to work conducted in qualitative and quantitative styles It synthesizes the vast and diverse field of methodology in a way that is clear concise and comprehensive While offering a handy overview of the subject the book is also an argument about how we should conceptualize methodological problems Tasks and criteria the author argues not fixed rules of procedure best describe the search for methodological adequacy Thinking about methodology through this lens provides a new framework for understanding work in the social sciences *Research Methods in Politics and International Relations* Christopher Lamont,Mieczyslaw P. Boduszynski,2024-12-04 The most practical guide to conducting research in Politics and International Relations This textbook sets out how to approach every stage of your research project from formulating a research question and research design to detailed guidance on using specific methods and writing up your paper Packed with practical tips throughout this second edition Offers a troubleshooting feature to help you with the most common blockages and questions at each stage of the process Has unrivalled coverage with brand new chapters on all the key methods used in Politics and IR from discourse analysis and interviews to descriptive and inferential statistics Engages with some of the most cutting edge research with examples spanning current issues from climate change to great power competition Helps you engage with theory in your research project with a standalone chapter mapping theoretical perspectives and how to engage with theory successfully in your research Is immersed in practical application with two Research in Practice features running throughout the book to show methods in practice Lamont and Boduszynski s new book is eminently readable and designed for all students of Politics and IR whether on an introductory methods course or undertaking a research project Christopher Lamont is Dean of E Track s International Relations program and Vice Dean of the Graduate School of International Relations at Tokyo International University in Japan Mieczyslaw P Boduszynski is Associate Professor of Politics and International Relations at Pomona College in California USA **Journal of Economic Literature** ,2007 Designing Research in the Social Sciences Martino Maggetti,Claudio Radaelli,Fabrizio Gilardi,2012-12-18 This innovative research design text will help you make informed choices when carrying out your research project Covering both qualitative and quantitative approaches and with

examples drawn from a wide range of social science disciplines the authors explain what is at stake when choosing a research design and discuss the trade offs that researchers have to make when considering issues such as causality categories and classification heterogeneity interdependence time This book will appeal to students and researchers looking for an in depth understanding of research design issues to help them design their projects in a thoughtful and responsible way
