High Performance Computing Carlos Jaime Barrios Hernández, Isidoro Gitler, Jaime Klapp, 2017-04-28 This book constitutes the proceedings of the Third Latin American Conference on High Performance Computing CARLA 2016 held in Mexico City Mexico in August September 2016 The 30 papers presented in this volume were carefully reviewed and

selected from 70 submissions They are organized in topical sections named HPC Infrastructure and Applications Parallel Algorithms and Applications HPC Applications and Simulations *Languages, scripts, and Chinese texts in East Asia* Peter Francis Kornicki, 2018-01-19 Chinese Writing and the Rise of the Vernacular in East Asia is a wide ranging study of vernacularization in East Asia not only China Japan Korea and Vietnam but also societies that no longer exist such as the Tangut and Khitan empires Peter Kornicki takes the reader from the early centuries of the common era when the Chinese script was the only form of writing and Chinese Buddhist Confucian and medical texts spread throughout East Asia through the centuries when vernacular scripts evolved right up to the end of the nineteenth century when nationalism created new roles for vernacular languages and vernacular scripts Through an examination of oral approaches to Chinese texts it shows how highly valued Chinese texts came to be read through the prism of the vernaculars and ultimately to be translated This long process has some parallels with vernacularization in Europe but a crucial difference is that literary Chinese was unlike Latin not a spoken language As a consequence people who spoke different East Asian vernaculars had no means of communicating in speech but they could communicate silently by means of written conversation in literary Chinese a further consequence is that within each society Chinese texts assumed vernacular garb in classes and lectures Chinese texts were read and declaimed in the vernaculars What happened in the nineteenth century and why are there still so many different scripts in East Asia How and why were Chinese texts dethroned and what replaced them These are some of the questions addressed in Chinese Writing and the Rise of the Vernacular in East Asia **Authorship and Text-making in Early China** Hanmo Zhang, 2018-10-08 This book is a timely response to a rather urgent call to seek an updated methodology in rereading and reappraising early Chinese texts in light of newly discovered early writings For a long time the concept of authorship in the formation and transmission of early Chinese texts has been misunderstood The nominal author who should mainly function as a guide to text formation and interpretation is considered retrospectively as the originator and writer of the text This book illustrates that although some notions about the text as the author's property began to appear in some Eastern Han texts a strict correlation between the author and the text results from later conceptions of literary history Before the modern era there existed a conceptual gap between an author and a writer A pre modern Chinese text could have had both an author and a writer or even multiple authors and multiple writers This work is the first study addressing these issues by more systematically emphasizing the connection of the text the author and the religious and sociopolitical settings in which these issues were embedded It is expected to constitute a palpable contribution to Chinese studies and the discipline of philology in general **Parallel Processing and Applied Mathematics** Roman Wyrzykowski, Ewa Deelman, Jack Dongarra, Konrad Karczewski, Jacek Kitowski, Kazimierz Wiatr, 2016-04-05 This two volume set LNCS 9573 and 9574 constitutes the refereed proceedings of the 11th International Conference of Parallel Processing and Applied Mathematics PPAM 2015 held in Krakow Poland in September 2015 The 111 revised full papers presented in both volumes were carefully reviewed and selected from

196 submissions The focus of PPAM 2015 was on models algorithms and software tools which facilitate efficient and convenient utilization of modern parallel and distributed computing architectures as well as on large scale applications including big data problems
