The Morphology and Phonology of Exponence Jochen Trommer, 2012-09-27 Exponence refers to the mapping of morphosyntactic structure to phonological representations a research area which is not only highly controversial but also approached in fundamentally different ways in theoretical morphology and phonology This volume brings together leading specialists from morphosyntax and morphophonology The authors address common problems questions and solutions in both areas and formulate a coherent research program for exponence which integrates the central insights of the last decades and provides important new challenges for the future The book is aimed at phonologists morphologists and syntacticians of all theoretical persuasions at graduate level and above

A Grammar of Atong Seino van Breugel, 2014-01-30 Atong is a Tibeto Burman language spoken in Northeast India and Bangladesh Seino van Breugel provides a deep and thorough coverage and analysis of all major areas of the grammar which makes this book of great interest and value to general linguists and typologists as well as area specialists Alongside an Atong English dictionary and five fully glossed Atong texts recorded during extensive fieldwork this work also provides a sizable ethnolinguistic introduction to the speakers and their culture Of particular interest is the pragmatic approach taken for the grammatical analysis Whereas the form of an utterance provides some clue as to its possible meaning inference is always needed to arrive at the most relevant interpretation within the context in which the utterance occurs This is a very important book for South Asian and Sino Tibetan linguistic scholarship Of the 200 languages of Northeast India only a handful have been documented the present work brings the number of full scale modern grammars for these languages to six Thus it represents a unique and extremely valuable contribution Professor Scott DeLancey University of Oregon This is a solid academic work which

makes a huge contribution to the field There is no other detailed account of this particular language and it is highly doubtful that anyone will write something more comprehensive in the future Dr Willem de Reuse University of North Texas

The Law and the Prophets Stephen B. Chapman, 2000 The standard theory of Old Testament canon formation describes a literary process of linear development in three successive stages In spite of intermittent criticism the theory has continued to find its place in textbooks and introductions Here Stephen B Chapman marshals all of the important counter arguments to the theory and proposes a fresh way to conceive of the canonical process based upon evidence internal and external to the biblical text He argues against the standard theory by exposing its internal inconsistencies and critiquing its methodological presuppositions especially its assumptions about human agency and the nature of canonization Using Charles Altieri's literary application of Canadian philosopher Charles Taylor's theory of the self the author redescribes the canonization of the Old Testament as a process of strong evaluation whose goal was to provide a religious framework for the evaluation of personal and communal alternatives rather than the imposition of ideology He redefines the Old Testament canon as the theological grammar formed by the coordination of discrete scriptures into a coherent collection but retaining their plurality as integral to canonicity Stephen B Chapman also demonstrates that the status of the prophetic writings prior to their canonization has remained an intractable problem for the standard theory He shows how nomistic assumptions about canonization have sustained the view that the prophetic corpus was always subordinate to the Pentateuch even though this view is at odds with the exegetical evidence By detailed analysis of canon conscious editing within the Pentateuch and the prophetic corpus he illustrates how collections of Law and Prophets developed simultaneously and mutually influenced each other

The Manambu Language of East Sepik, Papua New Guinea Alexandra Aikhenvald, 2008-09-04

This book is the first comprehensive description of the Manambu language of Papua New Guinea and is based entirely on the author's immersion fieldwork. Manambu belongs to the Ndu language family and is spoken by about 2,500 people in five villages: Avatip, Yawabak, Malu, Apapane and Yambon, Yuanab in East Sepik Province, Ambunti district. Manambu can be considered an endangered language. The Manambu language has many unusual properties. Every noun is considered masculine or feminine. Feminine gender, which is unmarked, is associated with small size and round shape and masculine gender with elongated shape, large size and importance. The Manambu culture is centered on ownership of personal names and is similar to that of the Iatmul described by Gregory Bateson. After an introductory account of the language and its speakers, Professor Aikhenvald devotes chapters to phonology, grammatical relations, word classes, gender, semantics, number, case, possession, derivation and compounding, pronouns, morphology, verbs, mood and modality, negation, clause structure, pragmatics, discourse, semantics, the lexicon, current directions of change and genetic relationship to other languages. The description is presented in a clear style in a framework that will be comprehensible to all linguists and linguistically oriented anthropologists.
