influential photographs ever made were taken almost as an afterthought by the astronauts of the Apollo space program from the moon They inspired a generation of scientists and environmentalists to think more seriously about our responsibility for this tiny oasis in space this blue marble falling through empty darkness The Earth Gazers is a book about the long road to the capture of those unforgettable images It is a history of the space program and of the ways in which it transformed our view of the earth and changed the lives of the astronauts who walked in space and on the moon It is the story of the often blemished visionaries who inspired that journey into space Charles Lindbergh Robert Goddard and Wernher Von Braun and of the courageous pilots who were the first humans to escape the Earth s orbit These twenty four people saw Earth in all its singular glory and the legacy of the stories of these Earth Gazers resonate richly even today
