

Commentary

The first sentence tells us the title, author, type of essay, topic, and thesis, with an observation that the thesis comes toward the end (inductive structure). Finding the thesis in personal writing can be especially demanding, because, in many cases, personal essayists use inductive or implicit central assertions (see Chapters 6 and 8). Notice that you can determine the thesis in this case by using the tip in your textbook to turn the essay title into a question and to read for an answer. Ask yourself what is the significant point about an anorexic's recovery. The significant thing, according to Rutherford's memoir, is that real healing requires the subject's will to heal herself or himself. The summary writer places this assertion at the opening of the summary, but otherwise follows the author's order of points, selecting just those that relate to the thesis. At the end of the summary, the writer quotes five telling words that reinforce the thesis. Because other words have not been quoted, these five gain extra weight. Note the use of third person, present tense, and impartial language. No evaluation of the essay occurs.

No Two Summaries Are Exactly Alike

We now give two somewhat different summaries of "The Rhetorical Stance." These were written by two different readers who did not compare notes or confer with each other in any way regarding interpretation. The two versions may help to illustrate the range of difference that is bound to occur between any two summaries of the same essay, as well as the essential congruence that should occur for successful summarization. Read our following commentary for a critique of these summaries as well as more information on how they were constructed.
