Jin, 2017-02-20 The dramatic advancement of cellphone technology has fundamentally changed our daily lives Smartphones and their applications have created new capital for information and communication technology corporations and changed the way people communicate Because of an interesting awareness of the significance for digital economy and people s daily culture many countries from the U S to China have massively invested in the smartphone industries since the early 21st century Among them South Korea has become one of the centers for technology development and digital culture although the

country was once lagging behind in the penetration of the phones and their apps Yet within the last few years the country has taken a big step toward their goal of becoming a mobile game wonderland by appropriating smartphones and it now exists as a curious test bed for the future of smartphone technology Smartland Korea as the first attempt to comprehensively analyze mobile communication in the context of Korean smartphones looks into a largely neglected focus of inquiry a localized mobile landscape with particular reference to young Koreans engagement with their devices and applications Dal Yong Jin focuses not only on the celebratory achievement of technological advancement but also the significance of social milieu in the development of the smartphones He situates the emergence of smartphones within the growth of mobile technologies and overall telecommunications industries embedded in Korea s information and communication technologies The book examines the technology s innovation and the evolution the digital economy through the lens of political economy and the youth culture embedded in the Korean smartphone context

How Information Systems Can Help in Alarm/Alert Detection

Florence Sedes, 2018-11-12 Alarm or alert detection remains an issue in various areas from nature i e flooding animals or earthquake to software systems Liveness dynamicity reactivity of alarm systems how to ensure the warning information reach the right destination at the right moment and in the right location still being relevant for the recipient in spite of the various and successive filters of confidentiality privacy firewall policies etc Also relevant in this context are to technical contingency issues material failure defect of connection break of channels independence of information routes and sources Alarms with crowd media mis information vs rumours how to make the distinction The prediction of natural disasters floods avalanches etc health surveillance affectionate fevers of cattle pollution by pesticides etc air sea and land transport or space surveillance to prevent Risks of collisions between orbital objects involve more and more actors within Information Systems one of whose purposes is the dissemination of alerts By expanding the capabilities and functionality of such national or international systems social networks are playing a growing role in dissemination and sharing eg with the support of systems like the Google Alert <https://www.google.fr/alerts> which concerns the publication of contents online Recently the Twitter microblogging platform announced a broadcast service designed to help government organizations with alerts to the public The proper functioning of such systems depends on fundamental properties such as resilience liveliness and responsiveness any alert must absolutely reach the right recipient at the right time and in the right place while remaining relevant to him despite the various constraints on the one hand to external events such as hardware failures connection faults breaks in communication channels on the other hand to confidentiality such as the collection and use of personal data with or without the consent of the user or the disparity of access policies generation according to industrial technological security constraints management of internal external policies etc between actors This book opens the discussion on the procrastination the dynamics and the reactivity of the alert systems but also the problems of confidentiality filtering of information and the means of distinguishing information and rumor Presents alarm or alert detection in all its aspects Finds a

solution so that the alert information reaches the right destination Find relevance to various technical issues *European Handbook of Crowdsourced Geographic Information* Cristina Capineri, Muki Haklay, Haosheng Huang, Vyron Antoniou, Juhani Kettunen, Frank Ostermann, Ross Purves, 2016-08-25 This book focuses on the study of the remarkable new source of geographic information that has become available in the form of user generated content accessible over the Internet through mobile and Web applications The exploitation integration and application of these sources termed volunteered geographic information VGI or crowdsourced geographic information CGI offer scientists an unprecedented opportunity to conduct research on a variety of topics at multiple scales and for diversified objectives The Handbook is organized in five parts addressing the fundamental questions What motivates citizens to provide such information in the public domain and what factors govern predict its validity What methods might be used to validate such information Can VGI be framed within the larger domain of sensor networks in which inert and static sensors are replaced or combined by intelligent and mobile humans equipped with sensing devices What limitations are imposed on VGI by differential access to broadband Internet mobile phones and other communication technologies and by concerns over privacy How do VGI and crowdsourcing enable innovation applications to benefit human society Chapters examine how crowdsourcing techniques and methods and the VGI phenomenon have motivated a multidisciplinary research community to identify both fields of applications and quality criteria depending on the use of VGI Besides harvesting tools and storage of these data research has paid remarkable attention to these information resources in an age when information and participation is one of the most important drivers of development The collection opens questions and points to new research directions in addition to the findings that each of the authors demonstrates Despite rapid progress in VGI research this Handbook also shows that there are technical social political and methodological challenges that require further studies and research

Lithium-Ion Cells Yury Koshtyal, Alexander Romyantsev, 2024-12-24 A large quantity of articles and books have been published on the designated topics However most of the literary sources describe the results of scientific articles on the synthesis and study of perspective materials reveal circuit and design solutions for constructing control systems and manufacturing batteries and are educational materials At the same time a small part of the published sources includes the following descriptions of materials produced industrially and used in the LIC manufacturing process demonstrations of the industrially produced LIC energy and power parameters analysis of the characteristics of manufactured miniature lithium ion cells solid state LICs lithium metal cells and all solid state cells as well as others Considering the popularity of the discussed topics one can hope to find detailed information on the Internet Indeed modern search engines make it possible to locate a sufficiently large number of relevant documents However while conducting such research we encountered the following challenges the data are somewhat fragmented and their systematization and structuring are required search results do not always meet search queries For instance data that were relevant to the topic were found but they did not match the query as accumulated data grow the

search time for new information extends the choice of search engine and location different countries affects search results the data are not indexed in search engines although the correct keywords and website were requested the information disappears due to website updates and the found data require additional processing For example many presentations show changes in the shape of the discharge curves depending on the discharge current strength In addition however Ragone plots are necessary for a correct comparison and therefore the mathematical processing of presented results is required Thus this book was written to systematize and structure information on industrially produced materials for LIC manufacturing and industrially produced and promising LICs and lithium metal rechargeable cells for various applications [Graphic Showbiz](#) Nanabanyin Dadson,2014-06-19 [Mobile Tech Report 2014](#) John R. Roberts,2014-01-10 If you read technology news you ll notice it s not just a story of amazing new product introductions or even that plus copycat product introductions All the usual aspects of business are there fierce competition new contenders old survivors great ideas but business failures mediocre ideas that somehow seem to succeed and prosper As a reporter commentator and blogger on mobile technology I ve collected what happened in the industry in 2013 and make predictions on what will and won t happen in 2014 You can read what did happen in the mobile technology in 2013 Often I deliver a comment with the news item and usually there is a link to the web page of the original announcement This way you can dive into any detail level you desire read my news feed for the overview or follow the related web link to the longer article History is moving so fast now that it is all recorded electronically but I m surprised no one else has collected it and presented it for consideration Here is 2013 from the mobile technology industry for your consideration along with my own observations and opinions about where things are headed It s often overlooked that the technology industry is an industry By that I mean its main concerns are profit and growth As consumers we love the new products and unique abilities we are gaining from technology but it is a business akin to any other trying to seduce us to pry money out of our wallets So I cover the horse race aspect of the business who s up who s down Is that changing Is that likely to change The longer implications of what the technology industry is doing are vast and social We are moving to an always on always connected society where we can communicate with someone instantly and find an answer to any question quickly The entire database of human knowledge is now available in the palm of your hand whenever you desire it Everything is there the good the bad right and wrong hate and love music and noise We are obsessed with technology not in and of itself but as a means to an end Technology is the means to satisfy our curiosity or even our desire for self expression We are taking photos machine gun style with our smartphones and choose the few to share As humans we are gathering ever more data about ourselves and sharing more about ourselves than we probably thought possible Bill Gates was once asked why the computer industry had generated so much improvement in its products over a relatively few years He gave some boring answer about Moore s Law but the real answer is that computers are in their teenage years They are growing and growing They will not always do so So too the technology industry is in a state of rapid change I see the shift to smaller devices as a new paradigm
