1. Draw a picture to show the division. Express your answer as a fraction.

a. $1 \div 4$

$1 \div 4 = \frac{1}{4}$

b. $3 \div 5$

$3 \div 5 = \frac{3}{5}$

c. $7 \div 4$

$7 \div 4 = \frac{7}{4} = 1 \frac{3}{4}$

2. Using a picture, show how six people could share four sandwiches. Then, write an equation and solve.

$4 \div 6 = \frac{4}{6}$

$4 \times \frac{1}{6} = \frac{4}{6} = \frac{2}{3}$

Remillard, Ok-Kyeong

Kim, 2020-03-16 The book presents comparative analyses of five elementary mathematics curriculum programs used in the U S from three different perspectives the mathematical emphasis the pedagogical approaches and how authors communicate with teachers These perspectives comprise a framework for examining what curriculum materials are comprised of what is involved in reading and interpreting them and how curriculum authors can and do support teachers in this process Although the focus of the analysis is 5 programs used at a particular point in time this framework extends beyond these specific programs and illuminates the complexity of curriculum materials and their role in teaching in general Our analysis of the mathematical emphasis considers how the mathematics content is presented in each program in terms of sequencing the nature of mathematical tasks cognitive demand and ongoing practice and the way representations are used Our analysis of the pedagogical approach examines explicit and implicit messages about how students should interact with mathematics one

another the teacher and the textbook around these mathematical ideas as well as the role of the teacher In order to examine how curriculum authors support teachers we analyze how they communicate with teachers and what they communicate about including the underlying mathematics noticing student thinking and rationale for design elements The volume includes a chapter on curriculum design decisions based on interviews with curriculum authors

International Handbook of Mathematics Teacher Education: Volume 4, 2020-12-15 This second edition of the International Handbook of Mathematics Teacher Education builds on and extends the topics ideas in the first edition while maintaining the themes for each of the volumes Collectively the authors looked back beyond and within the last 10 years to establish the state of the art and continuing and new trends in mathematics teacher and mathematics teacher educator education and looked forward regarding possible avenues for teachers teacher educators researchers and policy makers to consider to enhance and or further investigate mathematics teacher and teacher educator learning and practice in particular The volume editors provide introductions to each volume that highlight the subthemes used to group related chapters which offer meaningful lenses to see important connections within and across chapters Readers can also use these subthemes to make connections across the four volumes which although presented separately include topics that have relevance across them since they are all situated in the common focus regarding mathematics teachers Volume 4 The Mathematics Teacher Educator as a Developing Professional focuses on the professionalization of mathematics teacher educators which since the first Handbook continues to grow as an important area for investigation and development It addresses teacher educators knowledge learning and practice with teachers instructors of mathematics Thus as the fourth volume in the series it appropriately attends to those who hold central roles in mathematics teacher education to provide an excellent culmination to the handbook

Early Childhood Teachers' Professional Competence in Mathematics Simone Dunekacke, Aljoscha Jegodtka, Thomas Koinzer, Katja Eilerts, Lars Jenßen, 2021-09-30 This edited volume presents cutting-edge research on the professional competence of early childhood mathematics teachers. It considers professional knowledge, motivational-affective dispositions, skills, and performance in early childhood mathematics and outlines future fields of research in this area. The book argues that it is essential for early childhood teachers to prepare a high-quality learning environment and that mathematical competence is highly relevant for children's individual development. Bringing together research from mathematics education, educational science, and psychology, it integrates international perspectives and considers the contextual factors that affect the development of children's mathematical competence within Early Childhood Education and Care (ECEC) settings. The book uses a model to describe professional teacher competence that considers the dispositions of early childhood teachers, situation-specific skills of early childhood teachers, and the performance of early childhood teachers. The book is the first of its kind to give a comprehensive overview and allows for
