America the Vulnerable Joel Brenner, 2011-09-29 Now available in a new edition entitled GLASS HOUSES Privacy Secrecy and Cyber Insecurity in a Transparent World A former top level National Security Agency insider goes behind the headlines to explore America's next great battleground digital security An urgent wake up call that identifies our foes unveils their methods and charts the dire consequences for government business and individuals Shortly after 9/11 Joel Brenner entered the inner sanctum of American espionage first as the inspector general of the National Security Agency then as the head of counterintelligence for the director of national intelligence He saw at close range the battleground on which our adversaries are now attacking us cyberspace We are at the mercy of a new generation of spies who operate remotely from China the Middle East Russia even France among many other places These operatives have already shown their ability to penetrate our power plants steal our latest submarine technology rob our banks and invade the Pentagon's secret communications systems Incidents like the WikiLeaks posting of secret U.S. State Department cables hint at the urgency of this problem but they hardly reveal its extent or its danger Our government and corporations are a glass house all but transparent to our adversaries Counterfeit computer chips have found their way into our fighter aircraft the Chinese stole a new radar system that the navy spent billions to develop our own soldiers used intentionally corrupted thumb drives to download classified intel from laptops in Iraq And much more Dispatches from the corporate world are just as dire In 2008 hackers lifted customer files from the Royal Bank of Scotland and used them to withdraw 9 million in half an hour from ATMs in the United States Britain and Canada If that was a traditional heist it would be counted as one of the largest in history Worldwide corporations lose on average 5 million worth of intellectual property apiece annually and big companies lose many times that The structure and culture of the Internet favor spies over governments and corporations and hackers over privacy and we've done little to alter that balance Brenner draws on his extraordinary background to show how to right this imbalance and bring to cyberspace the freedom accountability and security we expect elsewhere in our lives In *America the Vulnerable* Brenner offers a chilling and revelatory appraisal of the new faces of war and espionage virtual battles with dangerous implications for government business and all of us

Taxing Wars Sarah Kreps, 2018-05-01 Why have the wars in Afghanistan and Iraq lasted longer than any others in American history The conventional wisdom suggests that the move to an all volunteer force and unmanned technologies such as drones have reduced the apparent burden of war so much that they have allowed these conflicts to continue almost unnoticed for years *Taxing Wars* suggests that the burden in blood is just one side of the coin The way Americans bear the burden in treasure has also changed and these changes have both

eroded accountability and contributed to the phenomenon of perpetual war Sarah Kreps chronicles the entire history of how America has paid for its wars and how its methods have changed Early on the United States imposed war taxes that both demanded sacrifices from all Americans and served as reminders of their participation Indeed thinkers from Immanuel Kant to Adam Smith argued that these reminders were exactly the reason why democracies tended to fight shorter and less costly wars Bearing these burdens caused the populace to sue for peace when the costs mounted Leaders in a democracy responsive to their citizens would have incentives to heed that opposition and bring wars to as expeditious an end as possible Since the Korean War the United States has increasingly moved away from war taxes Instead borrowing and its comparatively less visible connection with the war has become a permanent feature of contemporary wars The move serves leaders well because reducing the apparent burden of war has helped mute public opposition and any decision making constraints But by masking accountability however the move away from war taxes undermines the basis for democratic restraint in wartime Contemporary wars have become correspondingly longer and costlier as the public has become disconnected from those burdens Given the trends identified in *Taxing Wars* the recent past epitomized by our lengthy wars in Afghanistan and Iraq is likely to be prologue

Only the Most Able Stephen M. Duncan, 2012-10-05 The nature of the threats facing America today has drastically reduced the margin for error in senior political appointments In *Only the Most Able* Stephen M Duncan draws on a lifetime of military public service executive and legal experience to critique the political appointment process focusing on departments that deal with national security the Department of Defense and the Department of Homeland Security He looks at how the current methods for making appointments put people in positions for which they are not qualified and not prepared Rather he argues appointments should be made on the basis of one's qualifications and merits those who lead our military should be people with military experience and those who must make executive decisions should be people who have served and excelled in an executive capacity Identifying the successful traits of leaders such as Winston Churchill General George Marshall nationally known business executives and others Duncan argues with unusual insight and candor why the quality and performance of senior political appointees who are charged even in part with the nation's security must be improved and offers specific recommendations on how this can be accomplished This timely book will appeal to Americans of all political persuasions as well as those with particular interests in political and military history

Socializing Militants: How States End Asymmetric Conflict with Non-State Militants Jeremiah Rozman, 2023-05-09 The twentieth and twenty first centuries have seen states engaged in long term conflicts with asymmetrically weaker non state actors NSA States aim to end these conflicts as quickly as possible by combining force and diplomacy to socialize these militants meaning give them the characteristics of states in order to make a credible bargain achievable The militant's characteristics determine the state's optimal strategy In times of conflict politicians and pundits often march out an oft cited phrase in support of negotiations if you want to make peace you don't talk to your friends You talk to your enemies This is only possible when the opponent is willing to make peace under acceptable terms and able to enforce abidance Some opponents have an ideologically driven fundamental purpose that precludes renouncing violence under terms that a state could accept Others have reasonable demands and are structured in a way that allows productive negotiations In other cases the non state militant is not yet the type that can be bargained with but can be socialized into this type through a state's correct application of force and diplomacy I call this socialization logic I argue that optimally states tailor their strategy to socialize with their opponent to make it possible to successfully negotiate peace In practice the state's strategy is often distorted by its internal and external constraints Socialization logic provides a novel typology of non state militants based on how well interstate conflict bargaining concepts can be applied to them It looks beyond tactics to systematize a framework for understanding how leaders tailor strategy towards non state opponents based on their characteristics Socialization logic examines the NSA type as endogenous to the strategy that the state employs and provides a framework for leaders to design a strategy to end the conflict Finally socialization logic synthesizes critical NSA attributes ideology leadership structure and governance function and the state's strategy distorted by constraints into an interactive model Through 41 interviews primary and secondary source data I analyze the United States Russia's and Israel's asymmetric conflicts with militants and demonstrate that socialization logic most comprehensively explains their strategies throughout those conflicts

The Costs of Conversation Oriana Skylar Mastro Consulting LLC, 2019-03-15 After a war breaks out what factors influence the warring parties decisions

about whether to talk to their enemy and when may their position on wartime diplomacy change How do we get from only fighting to also talking In *The Costs of Conversation* Oriana Skylar Mastro argues that states are primarily concerned with the strategic costs of conversation and these costs need to be low before combatants are willing to engage in direct talks with their enemy Specifically Mastro writes leaders look to two factors when determining the probable strategic costs of demonstrating a willingness to talk the likelihood the enemy will interpret openness to diplomacy as a sign of weakness and how the enemy may change its strategy in response to such an interpretation Only if a state thinks it has demonstrated adequate strength and resiliency to avoid the inference of weakness and believes that its enemy has limited capacity to escalate or intensify the war will it be open to talking with the enemy Through four primary case studies North Vietnamese diplomatic decisions during the Vietnam War those of China in the Korean War and Sino Indian War and Indian diplomatic decision making in the latter conflict *The Costs of Conversation* demonstrates that the costly conversations thesis best explains the timing and nature of countries approach to wartime talks and therefore when peace talks begin As a result Mastro s findings have significant theoretical and practical implications for war duration and termination as well as for military strategy diplomacy and mediation

Obama and the Middle East Fawaz A. Gerges, 2012-05-22 A hard hitting assessment of Obama s current foreign policy and a sweeping look at the future of the Middle East The 2011 Arab Spring upended the status quo in the Middle East and poses new challenges for the United States Here Fawaz Gerges one of the world s top Middle East scholars delivers a full picture of US relations with the region He reaches back to the post World War II era to explain the issues that have challenged the Obama administration and examines the president s responses from his negotiations with Israel and Palestine to his drawdown from Afghanistan and withdrawal from Iraq Evaluating the president s engagement with the Arab Spring his decision to order the death of Osama bin Laden his intervention in Libya his relations with Iran and other key policy matters Gerges highlights what must change in order to improve US outcomes in the region Gerges conclusion is sobering the United States is near the end of its moment in the Middle East The cynically realist policy it has employed since World War II continued by the Obama administration is at the root of current bitterness and mistrust and it is time to remake American foreign policy
