neopatrimonial protectionism after reform when they have weak social connections to their regime and their regime has low support from global powers They are more likely to defend existing protectionist policies under these conditions resulting in less trade policy reform Drawing on interviews firm and industry level data and evidence from Jordan to Morocco Mirages of Reform reveals how international and domestic factors interact to shape the Arab world s rugged trade policy terrain Insightful and well researched this book imparts important lessons and warnings about the repercussions of economic reform in the region
