

Chapter 21 – Fundamental Tax Reform: Taxes on Consumption and Wealth

1. a. The income tax is 50 percent, so Zach pays $50\% \times \$10,000 = \$5,000$ in income taxes in the first period. In the second period, he earns \$500 in interest (10% of savings = $10\% \times \$5,000 = \500), so he pays taxes on interest of $50\% \times \$500 = \250 . The present value of Zach's lifetime tax payments equals $\$5,000 + [\$250/(1.1)] = \$5,227.27$.
- b. In the second period, Zach has savings and interest equal to \$5,500. He can consume \$3,667 in period 2 and must then pay $50\% \times \$3,667 = \$1,833.50$ in consumption taxes. The present value of Zach's lifetime tax payments is then equal to $\$5,000 + [\$1,833.50/(1.1)] = \$6,667$.

These calculations demonstrate the transitional problem in moving to a consumption tax because Zach had to pay high taxes during period 1 when he earned most of his income, and then had to pay high taxes during period 2 when he did his consuming.

2. The burden of the estate tax includes the resources used in estate planning and the effects of estate planning. Many families may alter their behavior in reaction to the estate tax and, if this results in less efficiency, the estate tax creates an excess burden that is not reflected by the number of taxable estates or the amount of tax revenue collected.
3. There is a fundamental confusion here. There is no reason to assume that the incidence of a general consumption tax (a VAT) will be the same as the incidence of a partial factor tax (corporate income tax).
4. a. For a fan giving a million-dollar ball to McGwire or Sosa, there would be a federal gift tax liability. Depending on the fan's circumstances, it could reach \$150,000 or more. The person receiving the gift owes no tax.
- b. If the fan keeps the ball, the fan would owe no tax now. But the ball would become part of his or her estate, taxable after death under the estate tax.
- c. The fan can avoid tax entirely by giving the ball to a charity, since he could entirely deduct the value of the ball from his taxable income. The charity could sell the ball; the proceeds from the sale would not be taxed.
- d. If the fan sells the ball, the fan owes tax on the net proceeds, just as the seller of any property would. The transaction would put the fan in the highest tax bracket, so that the marginal tax rate on the proceeds would be 39.6 percent.
- e. If the fan holds onto the ball for a year, it becomes a long-term capital asset, subject to the maximum capital-gains tax rate of 28 percent. Unless the fan thinks that there is going to be a substantial drop in the market value of the ball, he or she should hold onto it for a year.

□□□ Harvey S. Rosen, 2005 **Public Finance, Global Edition** Ted Gayer, HARVEY ROSEN, 2014-01-16 Rosen and Gayer's Public Finance provides the economic tools necessary to analyze government expenditure and tax policies and along the way takes students to the frontiers of current research and policy. While the information presented is cutting edge and reflects the work of economists currently active in the field, the approach makes the text accessible to undergraduates whose only prior exposure to economics is at the introductory level. The authors' years of policy experience have convinced them that modern public finance provides a practical and invaluable framework for thinking about policy issues. The goal is simple to emphasize the links between sound economics and the analysis of real world policy problems. Enhancements and key features for this new Global Edition include New Policy Perspectives introduce relevant and engaging examples of international policy so students can extend their understanding of theory to policymaking across the globe. New Empirical Evidence applications provide students with real world examples that are relevant to them from case studies about Sweden and China to global examples that compare experiences between countries. Updated end of chapter questions broaden critical thinking encouraging students to apply their knowledge to international and comparative examples. The results of econometric models are used to help students understand how expenditure and tax policies affect individual behavior and how governments set policies. Integrated theory and analysis. Institutional theoretical and empirical material is interwoven to provide students with a clear and coherent view of how government spending and taxation relate to economic theory. Current research is presented alongside discussion of methodological and substantive controversies. The approach is modern theoretical and empirical and shared by most active economists. Institutional and legal settings are described in detail and the links between economic analysis and current political issues are emphasized. This Global Edition has been adapted to meet the needs of courses outside of the United States and does not align with the instructor and student resources available with the US edition.

Public Economics I, 1995 Public Finance Harvey S. Rosen, 2005 Harvey Rosen's scholarly and up to date Public Finance continues to be the market leading book. The book takes its readers to the frontiers of current research yet remains accessible to undergraduates. Although it draws upon the latest research, the book never loses sight of the reality it is supposed to describe always drawing the links between economic analysis and current political issues. **Public Finance and Public Choice** John G. Cullis, Philip R. Jones, 1992 The authors critically analyze varying approaches to public finance contrasting the orthodox social optimality with the alternative public choice school. Both schools of thought are given full but critical attention. As well as the two schools mentioned above further approaches drawn from other social science disciplines are explained. Public Finance in Canada Harvey S. Rosen, 2003 The market leading book takes its readers to the frontiers of current research yet remains accessible to undergraduates. Although it draws upon the latest research, the book never loses sight of the reality it is supposed to describe always drawing the links between economic analysis and current political
