Aldo Rossi and the Spirit of Architecture Diane Ghirardo, 2019-01-01 This beautifully illustrated book provides a crucial new look at Aldo Rossi's built work in relationship to his writings drawings and product design and explores his contributions to the architecture in postwar Italy **A Scientific Autobiography, reissue** Aldo Rossi, 2010-01-29 A lyrical memoir by one of the major figures of postmodernist architecture with drawings of architectural projects prepared especially for the book This revealing memoir by Aldo Rossi 1937-1997 one of the most visible and controversial figures ever on the international architecture scene intermingles discussions of Rossi's architectural projects including the major literary and artistic influences on his work with his personal history Drawn from notebooks Rossi kept beginning in 1971 these ruminations and reflections range from his obsession with theater to his concept of architecture as ritual The Identity of the Architect Laura Iloniemi, 2019-12-23 Today there are more tools for communication than ever before yet very little in the way of reflection on how these are being used and even less on what exactly is being conveyed This issue of AD looks at how architecture is communicated from a cultural perspective Do the identities of practices or their business driven branding and promotional efforts resonate with the critical acclaim many architects seek Has slick image led media coverage sold the profession short How is it possible to convey the less visual and haptic qualities of architecture Can architects be more creative in their communication efforts making these joyous on their own terms as Le Corbusier did so memorably Is there really a need to succumb to the world of corporate marketing processes and managerial business jargon The issue explores notions of editing and curating work in an age of data deluge and discusses social media as a genuinely alternative space for communication rather than for just repurposing and regurgitating information relayed The Identity of the Architect encourages the promotion of practices as an integral extension of the very culture they hope to engender through their work

This book charts the fascinating history of architectural theory from the Renaissance to the present day Addressing its subject country by country and featuring over 850 illustrations it offers a chronological overview of the most important architects and architectural theoreticians from Alberti to Koolhaas Book jacket **Aldo Rossi** Aldo Rossi, 1993 Admired as much for his artistic ability as for his architectural skill Rossi has exhibited at galleries around the world *The City of Collective Memory* M. Christine Boyer, 1994 Describes the visual and mental models by which urban environment has been recognized depicted and planned This analysis draws from geography critical theory architecture literature and painting to identify these maps of the city as a work of art as panorama and as spectacle Italian Imprints on Twentieth-Century Architecture Denise Costanzo, Andrew Leach, 2022-05-19 Italian architecture has long exerted a special influence on the evolution of architectural ideas elsewhere from the Beaux Arts academy's veneration of Rome to modernist and postmodern interest in Renaissance proportion Baroque space and Mannerist ambiguity This book critically examines this enduring phenomenon exploring the privileged position of Italian architects architecture and cities in the architectural culture of the past century Questioning the deep rooted myth of Italy within architectural history the book presents case studies of Italy's powerful yet problematic position in 20th century architectural ideologies at a time when established Eurocentric narratives are rightly being challenged It reconciles the privileged position of Italian architecture and design with the imperative to write history across a more global diverse heterogeneous cultural geography Twenty chapters from distinguished international scholars cover subjects and architects ranging from Alberti to Gio Ponti Aldo Rossi Manfredo Tafuri Vittorio Gregotti cities from Rome and Venice to Milan and an array of international architects movements and architectural ideas influenced by Italy The chapters each question where how and why the disciplinary edifice of 20th century architecture its canon of built visual textual and conceptual works relied on Italian foundations examining where and how those foundations have become insecure Indispensable for students and scholars of both Italian and global architectural history Italian Imprints on Twentieth Century Architecture provides an opportunity to consider the architectural and urban landscape of Italy from substantially new points of view **The Architecture of Modern Italy** Terry Kirk, 2005-06-02 Modern Italy may sound like an oxymoron For Western civilization Italian culture represents the classical past and the continuity of canonical tradition while modernity is understood in contrary terms of rupture and rapid innovation Charting the evolution of a culture renowned for its historical past into the 10 modern era challenges our understanding of both the resilience of tradition and the elasticity of modernity We have a tendency when imagining Italy to look to a rather distant and definitely premodern setting The ancient forum medieval cloisters baroque piazzas and papal palaces constitute our ideal itinerary of Italian

civilization The Campo of Siena Saint Peter's all of Venice and San Gimignano satisfy us with their seemingly unbroken panoramas onto historical moments untouched by time but elsewhere modern intrusions alter and obstruct the view to the landscapes of our expectations As seasonal tourist or seasoned historian we edit the encroachments time and change have wrought on our image of Italy The learning of history is always a complex task one that in the Italian environment is complicated by the changes wrought everywhere over the past 250 years Culture on the peninsula continues to evolve with characteristic vibrancy Italy is not a museum To think of it as such as a disorganized yet phenomenally rich museum unchanging in its exhibits is to misunderstand the nature of the Italian cultural condition and the writing of history itself

The City as Architecture Sophie Wolfrum, Alban Janson, 2019-04-01 Architecture creates complex spatial situations that are the subject of urban design Design uses a repertoire of specific architectural means in a creative way resulting in cities that can be lived in and perceived in their three dimensional experience The current book an extended new edition of *Architecture of the City* 2016 describes the repertoire with which architecture and design regain an entry to urbanistics It pleads for an architectonic turn in urbanistics a demand to finally comprehend the city architecturally the issue is not just about buildings in the city but about architecture of the city as a whole as is clearly expressed in the new title of *City as Architecture*

City of Play Rodrigo Pérez de Arce, 2018-05-31 *City of Play* shows how play is built into the very fabric of the modern city From playgrounds to theme parks skittle alleys to swimming pools to the countless uncontrolled spaces which the urban habitat affords play is by no means just a childhood affair A myriad essentially unproductive playful pursuits have through time modelled the modern city and landscape Architect and scholar Rodrigo Pérez de Arce's erudite original and often surprising study explores a curiously neglected dimension of architectural design and practice ludic space It is an architectural history of the playground from the hippodrome to the Situationist city of space released from productive ends in the pursuit of leisure But this is more than just a book about how architecture has incorporated play into its spaces and structures it is a history of the modern city itself The ludic imagination impregnated modernist ideals and what begins with the playground ends with a reconsideration of the whole sweep of the modern movement through the filter of leisure and play Because play is such a basic or fundamental human experience the book re grounds the architect's concerns with those of non architects and not only those of adults but also of children It seeks to give everyone architects and other ordinary city dwellers alike a better understanding about what is at stake in the making of the public spaces of our cities

Analogical City Cameron McEwan, 2024-01-18 In *Analogical City* Cameron McEwan argues for architecture's status as a critical project McEwan revisits architect Aldo Rossi as a paradigmatic figure of the critical rational tradition studying a neglected aspect of his thought the analogical city to excavate its potential McEwan develops a grammar of the analogical city under the headings of Imagination Transformation City Multitude and Project McEwan argues that the analogical city is critical collective and emancipatory Analogical thought and understanding cities as analogical might open the conditions of

possibility for rethinking the critical project in architecture At a time when the humanities and the sciences are threatened by irrational thought from climate denial to post truth narratives and when architecture has seemingly disavowed its critical capacity and political possibility through its commodification as an instrument of the neoliberal city McEwan offers critical strategies conceptual tools figures of thought and knowledge practices to articulate modes of thinking and acting differently within architectural criticism and practice Today knowledge is a common terrain of struggle and thought requires constant reinvention The task of architecture and critique more broadly must be to interpret the world in order to change it Consequently Analogical City proposes modes for imagining the city the subject and the world otherwise towards a more egalitarian and critical architecture of the city Ultimately the analogical city is not a fully developed theory nor is it only an intuitive poetic or purely formal practice as some critics propose McEwan argues that the analogical city is poetic and political it always refers beyond itself towards a collective and critical project of the city and yet it invites a series of formal spatial and graphic operations comprising erasure and negativity followed by substitution and remontage *The Redundant City* Norbert Kling,2020-09-04 Dynamic processes and conflicts are at the core of the urban condition Against the background of continuous change in cities concepts and assumptions about spatial transformations have to be constantly re examined and revised Norbert Kling explores the rich body of narrative knowledge in architecture and urbanism and confronts this knowledge with an empirically grounded situational analysis of a large housing estate The outcome of this twofold research approach is the sensitising concept of the Redundant City It describes a specific form of collectively negotiated urban change **The Berlin Tenement and the City** Katharina Borsi,2025-06-23 The Berlin Tenement and the City describes the development of the Berlin tenement from 1860 to 1914 showing how it became both Berlin s standard housing type and its principal urban component the city s ubiquitous typology In contrast to earlier historical categorizations of the tenement as a rental barrack here it is described as an evolving typology that dynamically responded to the demands of the city and urban reform In this dynamic understanding of architecture the tenement is the protagonist of the actual unfolding of the city its growth and densification as well as its spatial and social differentiation Charting the evolution of the productive tenement into a morphology combining living and manufacturing and the rise of tenements increasingly differentiated according to class traces their contribution to the evolution and generalization of norms of housing and domesticity This book is essential reading for scholars students architects and urbanists interested in Berlin or the history of housing and the city Housing and the City Katharina Borsi,Didem Ekici,Jonathan Hale,Nick Haynes,2022-06-28 Housing and the City explores housing histories theories and projects in diverse geographies It presents a geographically dispersed history of the twentieth century modern housing project and its social diagram juxtaposed with case studies from the past and the present that suggest that we can live and work differently While the contributions are diverse in their theoretical approach and geographical situation their juxtaposition yields transversal connections in the conception of the home and the

city and highlights the diversity of architectural solutions in the formation of housing and its communities The collection also reveals architecture's contribution to the construction of the self and communities the individual and the collective as both urban spatial entities and socio political concepts Housing and the City provides essential reading for students academics and practitioners interested in the history theory or current design of housing At a time when cities are witnessing new ways of working changing social demographics increased geographical mobility and mass migrations as well as the pervasive threat of the climate crisis all trends exacerbated by the Covid 19 pandemic Housing and the City presents a historical and theoretical reflection on the question what does it mean to be at home in the city in the twenty first century

Theatres of Architectural Imagination Lisa Landrum, Sam Ridgway, 2023-05-17 This volume explores connections between architecture and theatre and encourages imagination in the design of buildings and social spaces Imagination is arguably the architect's most crucial capacity underpinning memory invention and compassion No simple power of the mind architectural imagination is deeply embodied social and situational Its performative potential and holistic scope may be best understood through the model of theatre *Theatres of Architectural Imagination* examines the fertile relationship between theatre and architecture with essays interviews and entr'actes arranged in three sections Bodies Settings and Inter Actions Contributions explore a global spectrum of examples and contexts from ancient Rome and Renaissance Italy to modern Europe North America India Iran and Japan Topics include the central role of the human body in design the city as a place of political drama protest and phenomenal play and world making through language gesture and myth Chapters also consider sacred and magical functions of theatre in Balinese and Persian settings eccentric experiments at the Bauhaus and 1970 Osaka World Expo and ecological action and collective healing amid contemporary climate chaos Inspired by architect and educator Marco Frascari the book performs as a Janus like memory theatre recalling and projecting the architect's perennial task of reimagining a more meaningful world This collection will delight and provoke thinkers and makers in theatrical arts and built environment disciplines especially architecture landscape and urban design

Terms of Appropriation Amanda Reeser Lawrence, Ana Miljački, 2017-12-06 This collection focuses on how architectural material is transformed revised swallowed whole plagiarized or in any other way appropriated It charts new territory within this still unexplored yet highly topical area of study by establishing a shared vocabulary with which to discuss or contest the workings of appropriation as a vital and progressive aspect of architectural discourse Written by a group of rising scholars in the field of architectural history and criticism the chapters cover a range of architectural subjects that are linked in their investigations of how architects engage with their predecessors
