Pierre Morenon, 2017-11-29 In the first half of the nineteenth century responsibility for child care primarily rested within families Needy children were often cared for by community sponsored efforts that varied widely in quality as well as by benevolent organizations dedicated to children s welfare The late 1800s was marked by major social service infrastructure construction and development During this period guided by progressive concerns about the role of the state in responding to societal changes resulting from urbanization and industrialization Rhode Island took on a more active statewide role in public education sewers parks prisons and child welfare systems New ideas about civil rights extended to race to women to labor and to children Old institutions such as town almshouses and poor farms were replaced by state institutions such as the State Home which opened in 1885 One might expect to find a huge record for custodial children well imbedded in regional literatures or social science and history texts yet this is not the case The State Home Project began in 2001 with no evocative life histories and no local or regional childhood narratives about the former residents of the State Home upon which to build It remains an important place because thousands of children and citizens lived portions of their lives there Documenting children s educational social and health experiences are not inconsequential To be sure varied narratives about custodial children developed as we dug into the soils read unexamined case histories and talked with former residents Archaeology offers the possibility of recovering lost and missing details and in collaboration with other disciplines creates a rich narrative of a place These experiences were significant in our past they are important to us in the present and to future generations They demonstrate our common history *Half-hours with the Best Authors* Charles Knight, 1849 **Where the Cherry Tree Grew** Philip Levy, 2013-02-12

Noted historian pens biography of Ferry Farm George Washington's boyhood home and its three centuries of American history In 2002 Philip Levy arrived on the banks of Rappahannock River in Virginia to begin an archeological excavation of Ferry Farm the eight hundred acre plot of land that George Washington called home from age six until early adulthood Six years later Levy and his team announced their remarkable findings to the world They had found more than Washington family objects like wig curlers wine bottles and a tea set They found objects that told deeper stories about family life a pipe with Masonic markings a carefully placed set of oyster shells suggesting that someone in the household was practicing folk magic More importantly they had identified Washington's home itself a modest structure in line with lower gentry taste that was neither as grand as some had believed nor as rustic as nineteenth century art depicted it Levy now tells the farm's story in *Where the Cherry Tree Grew* The land a farmstead before Washington lived there gave him an education in the fragility of life as death came to Ferry Farm repeatedly Levy then chronicles the farm's role as a Civil War battleground the heated later battles over its preservation and finally an unsuccessful attempt by Wal Mart to transform the last vestiges Ferry Farm into a vast shopping plaza
