Agents of Subversion John P. Delury, 2022-10-15 Agents of Subversion reconstructs the remarkable story of a botched mission into Manchuria showing how it fit into a wider CIA campaign against Communist China and highlighting the intensity and futility of clandestine operations to overthrow Mao In the winter of 1952 at the height of the Korean War the CIA flew a covert mission into China to pick up an agent Trained on a remote Pacific island the agent belonged to an obscure anti communist group known as the Third Force based out of Hong Kong The exfiltration would fail disastrously and one of the Americans on the mission a recent Yale graduate named John T Downey ended up a prisoner of Mao Zedong's government for the next twenty years Unraveling the truth behind decades of Cold War intrigue John Delury documents the damage that this hidden foreign policy did to American political life The US government kept the public in the dark about decades of covert activity directed against China while Downey languished in a Beijing prison and his mother lobbied desperately for his release Mining little known Chinese sources Delury sheds new light on Mao's campaigns to eliminate counterrevolutionaries and how the chairman of the Chinese Communist Party used captive spies in diplomacy with the West Agents of Subversion is an innovative work of transnational history and it demonstrates both how the Chinese Communist regime used the fear of special agents to tighten its grip on society and why intellectuals in Cold War America presciently worried that subversion abroad could lead to repression at home **Multibody Mechatronic Systems** Martín Pucheta, Alberto Cardona, Sergio Preidikman, Rogelio Hecker, 2020-10-22 This book gathers the latest advances innovations and applications in the field of multibody and mechatronic systems Topics addressed include the analysis and synthesis of mechanisms dynamics of multibody systems design algorithms for mechatronic systems robots and micromachines experimental validations theory of mechatronic simulation mechatronic systems for rehabilitation and assistive technologies mechatronic systems for energy harvesting virtual reality integration in multibody and mechatronic systems multibody design in robotic systems and control of mechatronic systems The contents reflect the outcomes of the 7th International Symposium on Multibody Systems and Mechatronics 7th MuSMe in 2020 within the framework of the FEIbIM Commission for Robotics and Mechanisms and
