War takes a critical look at the systems we use and how we ended up in a society that values data over personal liberty and commerce over the public good. It tells a compelling and previously untold story of how our ideas of information and knowledge reflect the century of war that has militarized our worldview. Author David Lankes's work has been funded by organizations such as The MacArthur Foundation, The Institute for Library and Museum Services, NASA, The U.S. Department of Education, The U.S. Department of Defense, The National Science Foundation, and The U.S. State Department. This his latest book will help all of us learn how war has shaped our world and how to begin to create an agenda to stand down weaponized data and a media that seeks to own our personal even intimate data like one owns a gold mine. *NANO-CHIPS 2030* Boris

Murmann, Bernd Hoefflinger, 2020-06-08 In this book a global team of experts from academia, research institutes and industry presents their vision on how new nano chip architectures will enable the performance and energy efficiency needed for AI driven advancements in autonomous mobility, healthcare and man machine cooperation. Recent reviews of the status quo as presented in CHIPS 2020 Springer have prompted the need for an urgent reassessment of opportunities in nanoelectronic information technology. As such this book explores the foundations of a new era in nanoelectronics that will drive progress in intelligent chip systems for energy efficient information technology on chip, deep learning for data analytics and quantum computing. Given its scope this book provides a timely compendium that hopes to inspire and shape the future of nanoelectronics in the decades to come. **Business India**, 2009-04 **Flat Panel Display Manufacturing** Jun

Souk, Shinji, Morozumi, Fang-Chen, Luo, Ion Bitu, 2018-09-24 An extensive introduction to the engineering and manufacture of current and next generation flat panel displays. This book provides a broad overview of the manufacturing of flat panel displays with a particular emphasis on the display systems at the forefront of the current mobile device revolution. It is structured to cover a broad spectrum of topics within the unifying theme of display systems manufacturing. An important theme of this book is treating displays as systems which expands the scope beyond the technologies and manufacturing of traditional display panels. LCD and OLED to also include key components for mobile device applications such as flexible OLED thin LCD backlights as well as the manufacturing of display module assemblies. Flat Panel Display Manufacturing fills an important gap in the current book literature describing the state of the art in display manufacturing for today's displays and looks to create a reference for the development of next generation displays. The editorial team brings a broad and deep perspective on flat panel display manufacturing with a global view spanning decades of experience at leading institutions in Japan, Korea, Taiwan and the USA and including direct pioneering contributions to the development of displays. The book includes a total of 24 chapters contributed by experts at leading manufacturing institutions from the global FPD industry in Korea, Japan, Taiwan, Germany, Israel and USA. Provides an overview of the evolution of display technologies and manufacturing. Treats display products as systems with manifold applications expanding the scope beyond traditional display panel manufacturing to key components for mobile devices and TV applications.
