2. Levier
1. Selector de bloqueo del diferencial "LOCK"/"4WD"
2. Palanca

Differential gear lock switch "LOCK"/"4WD"

To lock the differential gear in 4WD, make sure the On-Command four-wheel-drive switch is set to "4WD", stop the ATV, move the lever to position ②, and then set the switch to "LOCK". When the differential gear is locked, the differential gear lock indicator ("DIFF LOCK") light will come on along with the indicator "4WD" in the speedometer unit display.

To release the differential gear lock, stop the ATV and set the switch to "4WD".

⚠ WARNING

Always ride at a slow speed when the ATV is in 4WD-LOCK, and allow extra time and distance for maneuvers.

All wheels turn at the same speed when the differential is locked, so it takes more effort to turn the ATV. The amount of effort is more the faster you go. You may lose control and have an accident if you cannot make a sharp enough turn for the speed you are traveling.
