

SELECTING RIBBON COLOR

... typing stencils

The Ribbon Color Selector (15) on the upper right of the keyboard regulates which part of the ribbon is used for typing. Push the lever up to type with the black part and down to type with red. To type stencils, set the Selector at the middle position, where the keys will leave no inked impression.

TOUCH SELECTOR

With the Touch Selector (22) on your new Sears Electric, you can adjust the tension on the typing keys to match your own typing touch. The Selector is on the bottom of the typewriter, under the Spacebar. For a light typing touch, turn the dial towards L; for a heavier touch, turn it towards H.

TABULATOR

Any time you need to skip the same number of spaces several times in typing, you save time and energy by using the Tab Bar (30). To type columns or indent paragraphs, for example, move the carriage to the desired spot, and depress the Tab SET Key (29). Do this for as many tab stops as you need. Each time you want to type at one of these spots, depress the Tab Bar. The carriage will move to each succeeding stop each time the bar is depressed.

To clear a stop, tabulate to it and depress the CLEAR Key (14). To clear all stops at once if you're at the end of a typing line, press the Carriage RETURN Key and the CLEAR Key at the same time. If you're at the beginning of a line, depress the Tab Bar and CLEAR Key at the same time.
