Oxford Successful Mathematics ,2013 Appraisal ,2000 Resources in Education ,1988 *Borderlines and Borderlands* Alexander C. Diener,Joshua Hagen,2010 From our earliest schooldays we are shown the world as a colorful collage of countries each defined by their own immutable borders What we often don t realize is that every political boundary was created by people No political border is more natural or real than another yet some international borders make no apparent sense at all While focusing on some of these unusual border shapes this fascinating book highlights the important truth that all borders even those that appear normal are social constructions In an era where the continued relevance of the nation state is being questioned and where transnationalism is altering the degree to which borders effectively demarcate spaces of belonging the contributors argue that this point is vital to our understanding of the world The unique and compelling histories of some of the world s oddest borders provide an ideal context for this group of experts to offer accessible and enlightening discussions of cultural globalization economic integration international migration imperialism postcolonialism global terrorism nationalism and supranationalism Each author s regional expertise enriches a textured account of the historical context in which these borders came into existence as well as their historical and ongoing influence on the people and states they bound To view more maps from the David Rumsey Map Collection visit www.davidrumsey.com Contributions by Eric D Carter Karen Culcasi Alexander C Diener Joshua Hagen Reece Jones Robert Lloyd Nick Megoran Julian V Minghi David Newman Robert Ostergren and William C Rowe

Oxford Guide to Metaphors in CBT Richard Stott,Warren Mansell,Paul Salkovskis,Anna

Lavender,Sam Cartwright-Hatton,2010-05-13 The business of cognitive therapy is to transform meanings What better way to achieve this than through a metaphor Metaphors straddle two different domains at once providing a conceptual bridge from a problematic interpretation to a fresh new perspective that can cast one s experiences in a new light Even the simplest metaphor can be used again and again with different clients yet still achieve the desired effect One such example is the broken leg metaphor for depression Clients with depression are understandably frustrated with their symptoms They may often push themselves to get better or tell themselves that they should be better by now As a therapist it is fair to ask would the client be so harsh and demanding on herself after getting a broken leg A broken leg needs time to heal and you need to begin to walk on it gradually as it builds up in strength You can t run before you can walk and if you try you are likely to make it worse For many clients this simple metaphor is enlightening changing their view of their symptoms as a sign of their own laziness and worthlessness to a view of them as part of an understandable illness that while open to improvement cannot get better over night This book shows just how metaphors can be used productively in CBT as an integral part of the treatment It describes the use of metaphors for a wide range of problems including anxiety and depression and provides countless examples of metaphors that have been used by others in CBT It brings together in one place hundreds of metaphors that experienced therapists have used to great success It will be a valuable sourcebook for all cognitive behaviour therapists as well as those training in CBT
