The Oxford Handbook of Qualitative Research Patricia Leavy, 2014 The Oxford Handbook of Qualitative Research presents a comprehensive and student friendly overview of the field of qualitative research and is intended for students of all levels faculty and researchers across the social sciences It provides strong focus on methods instruction with coverage of theoretical approaches analysis writing evaluation and the politics of research **BMJ**, 1999 *The Oxford Handbook of Translation and Social Practices* Sara Laviosa, Meng Ji, 2020-12-01 The discipline of translation studies has gained increasing importance at the beginning of the 21st century as a result of rapid globalization and the development of computer based translation methods Today changing political economic health and environmental realities across the world are generating previously unknown inter language communication challenges that can only be understood through a socially oriented and data driven approach The Oxford Handbook of Translation and Social Practices draws on a wide array of case studies from all over the world to demonstrate the value of different forms of translation written oral audiovisual as social practices that are essential to achieve sustainability accessibility inclusion multiculturalism and multilingualism Edited by Meng Ji and Sara Laviosa this timely collection illustrates the manifold interactions between translation studies and the social and natural sciences enabling for the first time the exchange of research resources and methods between translation and other domains experts Twenty nine chapters by international scholars and professional translators apply translation studies methods to a wide range of fields including healthcare environmental policy geological and cultural heritage conservation education tourism comparative politics conflict mediation international law commercial law immigration and indigenous rights The articles engage with numerous languages from European and Latin American contexts to Asian and Australian languages giving unprecedented weight to the translation of indigenous languages The Handbook highlights how translation studies generate innovative solutions to long standing and emerging social issues thus reformulating the scope of this discipline as a socially oriented empirical and ethical research field in the 21st century [The Oxford Handbook of Evolutionary Medicine](#) Martin Brüne, Wulf Schiefenhövel, 2019-01-31 Medicine is grounded in the natural sciences where biology stands out with regard to our understanding of human physiology and the conditions that cause dysfunction Ironically though evolutionary biology is a relatively disregarded field One reason for this omission is that evolution is deemed a slow process Indeed the macroanatomical features of our species have changed very little in the last 300 000 years A more detailed look however reveals that novel ecological contingencies partly in relation to cultural evolution have brought about subtle changes pertaining to metabolism and immunology including adaptations to dietary innovations as well as adaptations to the exposure to novel pathogens Rapid pathogen evolution and evolution of cancer cells cause major problems for the immune system Moreover many adaptations to past ecologies have actually turned into risk factors for somatic disease and psychological disorder in our modern worlds i e mismatch among which epidemics of autoimmune diseases cardiovascular diseases

diabetes and obesity as well as several forms of cancer stand out One could add depression anxiety and other psychiatric conditions to the list The Oxford Handbook of Evolutionary Medicine is a compilation of up to date insights into the evolutionary history of ourselves as a species exploring how and why our evolved design may convey vulnerability to disease Written in a classic textbook style emphasising physiology and pathophysiology of all major organ systems the Oxford Handbook of Evolutionary Medicine is valuable reading for students as well as scholars in the fields of medicine biology anthropology and psychology
