The Phonology of Classical Latin Andras Cser, 2020-08-31 This work is a comprehensive corpus based description of the synchronic segmental phonology of Classical Latin. Provides a full description of the phonology of a dead language and also highlights how the patterns and processes described contribute to phonological theory. Research results include novel analyses of segmental phenomena, phonotactics, phonological processes, inflectional morphology, and certain diachronic questions. Informed by specific hypotheses about how phonological representations are structured and how phonological rules work, and in turn how the findings corroborate these hypotheses. Theoretically grounded and provides raw material for researchers of phonology, morphology, and historical linguistics.

The Politics of Translation in the Middle Ages and the Renaissance Renate Blumenfeld-Kosinski, 2001-03-07 The articles in this collection, written by medievalists and Renaissance scholars, are part of the recent cultural turn in translation studies, which approaches translation as an activity that is powerfully affected by its socio-political context and the demands of the translating culture. The links made between culture, politics, and translation in these texts highlight the impact of ideological and political forces on cultural transfer in early European thought. While the personalities of powerful thinkers and translators such as Erasmus, Etienne Dolet, Montaigne, and Leo Africanus play into these texts, historical events and intellectual fashions are equally important moments, such as the Hundred Years War, whose events were partially recorded in translation by Jean Froissart; the political tussles around the issues of lay readers and rewriters of biblical texts; the theological and philosophical shift from scholasticism to Renaissance relativism; or European relations with the Muslim world add to the interest of these articles. Throughout this volume, translation is treated as a form of writing, as the production of text and meaning carried out in a certain cultural and political ambiance, and for identifiable though not always stated reasons. No translation, this collection argues, is an innocent, transparent rendering of the original.

Latin Scientific Literature, 1450-1850 Martin Korenjak, 2023-09-20 During the early modern period, the emergence of what ultimately became modern science took place mainly in Latin, the international language of educated discourse of the era. Hundreds of thousands of scientific texts were published in Latin from the invention of print around 1450 to the demise of Latin as a language of science around 1850. Despite its importance, our knowledge of this literature is extremely limited. This book aims to provide an overview of this area, the first ever to be written. It does so not from the perspective of a natural scientist or a historian of science, but of a literary scholar. Instead of the scientific content or methodology of the respective works, it focusses on the genres of scientific literature and their communicative functions. Latin Scientific Literature, 1450-1850 falls into two main parts. The first part, Contexts, introduces four aspects of early modern intellectual culture which are crucial for an understanding of the scientific literature of the time: the development of science, the role of Latin, the concept of literature, and the rise of print. Part two, Texts, offers an overview of Neo-Latin scientific literature, subsumed under five communicative functions: disclosing sources, presenting facts, arguing

for certain positions summarizing knowledge and publicizing science twenty pertinent genres are discussed **The United States Catalog** ,1903 *The Saturday Review of Politics, Literature, Science, Art, and Finance* ,1905 **A Dictionary of the Anonymous and Pseudonymous Literature of Great Britain: TIT-ZOR** Samuel Halkett,John Laing,1888
