psychology providing the tools and techniques for gathering information to inform our understanding of human behavior. However, the continued growth and new developments in the assessment literature requires an ongoing examination of the principles and practices of central importance to psychological assessment. The Oxford Handbook of Child Psychological Assessment covers all areas of child and adolescent assessment. Leaders in the field summarize and synthesize state of the science assessment theories, techniques, and applications. Placing an emphasis on clinical and psychoeducational assessment issues, chapters explore issues related to the foundations, models, special topics, and practice of psychological assessment. ITL. Katholieke Universiteit te Leuven. Instituut voor Toegepaste Linguïstiek, 2000. *Multimedia, Computer Graphics and Broadcasting*. Dominik Slezak, William I. Grosky, Niki Pissinou, Timothy K. Shih, Tai-hoon Kim, Byeong-Ho Kang, 2009-11-24. As future generation information technology (FGIT) becomes specialized and fragmented, it is easy to lose sight that many topics in FGIT have common threads and because of this, advances in one discipline may be transmitted to others. Presentation of recent results obtained in different disciplines encourages this interchange for the advancement of FGIT as a whole. Of particular interest are hybrid solutions that combine ideas taken from multiple disciplines in order to achieve something more significant than the sum of the individual parts. Through such hybrid philosophy, a new principle can be discovered which has the propensity to propagate throughout multifaceted disciplines. FGIT 2009 was the first mega conference that attempted to follow the above idea of hybridization in FGIT in a form of multiple events related to particular disciplines of IT, conducted by separate scientific committees but coordinated in order to expose the most important contributions. It included the following international conferences: Advanced Software Engineering and Its Applications, ASEA Bio Science and Bio Technology, BSBT Control and Automation, CA Database Theory and Application, DTA Disaster Recovery and Business Continuity, DRBC published independently, Future Generation Communication and Networking, FGCN that was combined with Advanced Communication and Networking, ACN Grid and Distributed Computing, GDC Multimedia, Computer Graphics and Broadcasting, MulGraB Security Technology, SecTech Signal Processing, Image Processing and Pattern Recognition, SIP and e Service Science and Technology, UNESST.
