Single engine low wing monoplane fighter developed by the American aircraft manufacturer Bell Aircraft Corporation in the
second half of the 1930s It was the first fighter in the world to have a tricycle landing gear and the first to have the engine
installed in the center of the fuselage behind the pilot The Bell P 39 Airacobra is still one of the most controversial fighter
aircraft of World War II With its sleek racing lines apparent high speed and powerful gun it received much positive publicity
before the United States entered the war but was rejected as a front line fighter by the RAF and was generally unpopular
among American pilots who flew it in combat Rejected by the RAF after only one combat mission it was on the other hand
particularly appreciated by the Soviet Union Air Force which received almost half of the production thanks to the Lend Lease
Act and used it mainly at low altitude in the roles of free fighter and interceptor of enemy bombers and fighter bombers From

the Bell workshops located in Buffalo came out about 9 600 examples of P 39 Airacobra divided into ten versions in a period of time ranging from 1938 to 1944 The engine unit of the Bell P 39 was throughout its evolutionary process the Allison V 1710 a twelve cylinder with V architecture and liquid cooling with powers from 1 150 hp to 1 325 hp **Air Pictorial** ,1999
