

# Person-Centered Care

A diagram illustrating the principles of Person-Centered Care. At the center is a large, light gray circle containing the text "Person-Centered Care". Surrounding this central circle are six smaller, overlapping circles, each with a different color and a specific principle. The circles are connected by a thin, light gray line that forms a hexagonal shape around the center. The principles are: "Empowers Recipient of Care" (orange circle at the top), "Improves Quality of Life" (light gray circle at the top right), "Supports Independence" (green circle at the bottom right), "Promotes Positive Well-Being" (blue circle at the bottom), "Honors Choice" (purple circle at the bottom left), and "Promotes Respect" (red circle at the top left).

**The Philosophy of Person-Centred Healthcare** Derek Mitchell,Michael Loughlin,2022-11-22 This book sets out a philosophical basis for person centred healthcare primarily using work by Heidegger and Gadamer but drawing on ideas derived from Aristotle and process philosophy in order to show how practice can be improved and how examples of person centred practice can be transferred between individuals and institutions involved in the commissioning and provision of healthcare By providing an underlying architectonic this work will help to enable practitioners to understand the benefits of person centred healthcare practice in promoting autonomy in those who are suffering from chronic and other illnesses The text takes a phenomenological approach to healthcare because it offers a rich and subtle way of thinking about how we know what we know and this applies to our knowledge and understanding of how healthcare works just as much as it does to all other kinds of knowledge For those in clinical practice this book provides a guide to the thinking behind person centred healthcare

*Appreciative Healthcare Practice: A guide to compassionate, person-centred care* Dr Gwilym Wyn Roberts,Dr Andrew Machon,2015-07-08 Written by a leading healthcare academic and an accredited international business coach this book takes

a new approach to one of the most crucial issues in healthcare how to care for patients appreciatively responsively and compassionately In the light of the findings of the Francis Report 2013 and at a time when healthcare services are under enormous pressure there is a clear and urgent need for such a book Despite the challenges of ill health the authors demonstrate that the opportunity is there for any healthcare practitioner to draw out what the patient needs and desires in line with the patient s own values purposes and beliefs This approach seeks to alleviate suffering and allows the patient to be more empowered and motivated to change discovering choice and possibility in times of adversity In this way the practitioner can help the patient increase their own resilience and resourcefulness At the same time the practitioner discovers their own ability to self care and self manage Aimed at healthcare students and practitioners at all levels Appreciative Healthcare Practice will provide a valuable and supportive learning resource for a wide range of individuals involved in caring Contents include Introduction Carers stories Compassionate and dignified care Professionalism on becoming a professional Applying appreciative inquiry in practice and education Creativity and care Applying the three eye model to healthcare Mindful healthcare practice The appreciative care worker and coach

*Person Centered Medicine* Juan E. Mezzich, W. James Appleyard, Paul Glare, Jon Snaedal, C. Ruth Wilson, 2023-04-13 The 21st is being recognized as the Century of the Person particularly in Medicine and Health Person Centered Medicine as a concept and global programmatic movement developed in collaboration with the World Medical Association World Health Organization International Council of Nurses and 30 other institutions over a decade of annual Geneva Conferences places the whole person as the center of health and as the goal and protagonist of health actions Seeking the person at the center of medicine has meant a medicine of the person for the person by the person and with the person Articulating science and humanism it strives for a medicine informed by evidence experience and values and aimed at the restoration and promotion of health for all The textbook on Person Centered Medicine reviews this perspective as it has evolved to date and its resulting knowledge base The book structure encompasses an Introduction to the field and four sections on Principles Methods Specific Health Fields and Empowerment Perspectives Its 42 chapters are authored by 105 clinician scholars from 25 different countries across world regions North America Latin America Europe Africa the Middle East Asia and Oceania Its vision and goals involve total health for a total person Ongoing work and upcoming publications would focus on redesigning health systems fit to purpose and integrating ancestral knowledge and wisdom community members self and mutual care advances in medical science and the contributions of health relevant social sectors

#### **Intelligent Systems for Sustainable**

**Person-Centered Healthcare** Dalia Kriksciuniene, Virgilijus Sakalauskas, 2022-02-17 This open access book establishes a dialog among the medical and intelligent system domains for igniting transition toward a sustainable and cost effective healthcare The Person Centered Care PCC positions a person in the center of a healthcare system instead of defining a patient as a set of diagnoses and treatment episodes The PCC based conceptual background triggers enhanced application of Artificial Intelligence as it dissolves the limits of processing traditional medical data records clinical tests and surveys Enhanced knowledge for diagnosing treatment and rehabilitation is captured and utilized by inclusion of data sources characterizing personal lifestyle and health literacy and it involves insights derived from smart ambience and wearables data community networks and the caregivers feedback The book discusses intelligent systems and their applications for healthcare data analysis decision making and process design tasks The measurement systems and efficiency evaluation models analyze ability of intelligent healthcare system to monitor person health and improving quality of life

**Occupational Therapy and Dementia** Fiona Maclean, Dr Alison F Warren, Lyn Westcott, Elaine Hunter, 2022-12-21 With contemporary approaches based on theory and the lived experience of dementia Occupational Therapy and Dementia is written using an occupational justice lens It examines how core elements of how occupational therapy may support the person living with dementia through valued activity in continuing engagement in their lives sustaining their identity and sense of purpose This edited collection critically analyses traditional thinking about dementia practice from over 40 contributors challenging readers to reflect and develop their work Drawing on policy and legislation related to health and social care readers are given tools to focus their practice towards what is important to the person living with dementia Most importantly this book gives a voice to people living with dementia emphasising their expertise A combined emphasis on human rights and occupational justice for people living with dementia offers both a theoretical and practical frame to develop your occupational therapy practice

Person-Centered Healthcare Department of Physiology Faculty of Health and Life

Sciences Andrew Miles,2018-03-18 A collection of 30 essays from experts in the field of Person Centered Healthcare

*Philosophical Health* Luis de Miranda,2023-12-28 Bringing together leading international and interdisciplinary scholars this ground breaking volume examines the theory and practice of philosophical health in contemporary contexts of care broadly understood care for the self care for the other and care for the world But what do we mean by philosophical health Whilst this book does not seek to provide a normative definition as it explores disparate perspectives and encourages pluralism in philosophical ways of life one may envision philosophical health as a state of creative coherence between a person s or a group s way of thinking and their way of acting such that the possibilities for a good life are increased and the needs for flourishing satisfied An idea central to philosophical health is the concept of possibility Without a sense of self possibility and openness to the future health loses meaning and conversely pathologies are defined by various kinds of impossibilities As such philosophical health reconsiders care as a process of cultivating or pruning the compossible in embodied psychological and social terms of allowing things to re generate or in some cases to vanish Drawing on the history of philosophy phenomenology new materialism post colonialism but also a wide range of contemporary approaches to philosophical practice Philosophical Health sheds light on the understudied philosophical dimension of care and the healing dimension of philosophizing Advocating philosophy as a lived practice it uncovers the increasing relevance of philosophical health to contemporary debates on well being well belonging counselling and development **Patient-Centered**

**Healthcare** Eldo Frezza,2019-08-22 Patient centered care is a way of thinking and doing things that considers patients partners in the development of a healthcare plan designed to meet their specific needs It involves knowledge of the individual as a person and integrates that knowledge into their plan of care Patient centered care is central to the discussion of healthcare at the insurance and hospital level The quality of the service is evaluated more deeply from all the healthcare components including insurance payments It is the start of a new client and patient centered healthcare which is based on a profound respect for patients and the obligation to care for them in partnership with them Healthcare has been lacking a strategy to teach patients how to take care of themselves as much as they possibly can In countries with socialized healthcare patients don t go to the emergency room unless it is necessary they have a physician on call instead This affords more personalized care and avoids patients getting lost in the hospital system This book advocates the critical role of patients in the health system and the need to encourage healthy living We need to educate patients on how to be more self aware giving them the tools to better understand what they need to do to achieve healthy lifestyles and the protocols and policies to sustain a better life Prevention has always been the pinnacle of medical care It s time to highlight and share this approach with patients and involve them as active participants in their own healthcare This is the method on which to build the new healthcare for the next century Coaching for Person-Centred Healthcare Elaine Cook,Gilbert J. Greene,Joanne

Maxwell,2024-10-31 This guide introduces a humanistic solution focused coaching model using lived experience to

demonstrate how profound changes in our healthcare experiences and system for patients and staff are possible while also supporting readers to develop their own coaching skills Combining research theory and practice shared through personal experience readers are introduced to solution focused dialogic tools for use in promoting person centred care The first section of the book introduces the coaching model and explores its theoretical and philosophical underpinnings drawing on theories from neuroscience neurobiology communication sciences humanistic psychology and positive psychology The second section of the book transitions from theory and research into clinical practice making evident the broad range of healthcare contexts and domains in which the humanistic solution focused approaches are implemented as well as the profound personal and professional implications associated with their use The third section of the book focuses on the lived experience of four people focusing on their interactions with healthcare before and after their coaching training emphasizing the difference a humanistic solution focused approach has made for them and their families The final section then turns to organizational change and explores how solution focused coaching provides insights perspectives and aspirations for system change This engaging text is ideal reading for healthcare professionals teachers and leaders looking to develop and improve the care they deliver the experiences of the people they are working with and the organizations they deliver it within

*Innovative Staff Development in Healthcare* Renate Tewes, 2021-11-19 This book explains how staff development is an important element for a sustainable staff structure health care facilities At the end

each chapter the reader finds a to do list to replicate the project The book is divided into 4 parts 1 Practicing culture change 2 Learning emotional intelligence 3 Establishing interprofessional collaboration and 4 How to create the future of healthcare Anticipating these options and experiences will help leaders to inspire their teams with practical ideas To find the right trainings for staff development can be time consuming With this overview about international successful projects the reader has an update about innovations in healthcare and uses the knowledge for the reader's own team or healthcare institution This book helps readers experiencing their own culture change in their organisation and create the future of their team or facility with knowledge about how to develop a person centred culture how to implement the TeamProcessPerformance in their operation theatre how to reduce stress by using simple HeartMath methods This book also informs on how to establish wellbeing at the workplace and how to practice interprofessional collaboration to reduce mistakes and costs Written by authors from UK Turkey USA Scotland Ireland and Germany this book offers human resource managers a look beyond their national horizon and presents innovative international concepts

#### **Person-centred Health Care** Stephen

Buetow, 2016-06-10 Person centred health care is increasingly endorsed as a key element of high quality care yet in practice it often means patient centred health care This book scrutinizes the principle of primacy of patient welfare which although deeply embedded in health professionalism is long overdue for critical analysis and debate It appears incontestable because patients have greater immediate health needs than clinicians and the patient clinician encounter is often recognized as a moral enterprise as well as a service contract However Buetow argues that the implication that clinician welfare is secondary can harm clinicians patients and health system performance Revaluing participants in health care as moral equals this book advocates an ethic of virtue to respect the clinician as a whole person whose self care and care from patients can benefit both parties because their moral interests intertwine and warrant equal consideration It then considers how to move from values including moral equality in health care to practice for people in their particular situations Developing a genuinely inclusive concept of person centred care accepting clinicians as moral equals it also facilitates the coalescence of patient centred care and evidence based health care This reflective and provocative work develops a constructive alternative to the taken for granted principle of primacy of patient welfare It is of interest to students and academics in the health and caring sciences philosophy ethics medical humanities and health management

#### *Intellectual Disabilities: Health and Social Care*

*Across the Lifespan* Fintan Sheerin, Carmel Doyle, 2023-06-19 This textbook provides nurses allied health and social care professionals with the background knowledge necessary to support individuals with intellectual disabilities and their families It is a unique and viable resource which is particularly timely as recent decades have seen a significant change in the demographics and associated care and support needs of this population The textbook is laid into four sections to provide a logical structure for the content with chapters developing key topic areas relevant to the field The introductory section sets the overall context for the book and considers the importance of developing an understanding of intellectual disability as a

core concept identifying philosophies and models of service that underpin health and social care across the lifespan Communication as a basis for caring and the overall concept of person centred caring in a multidisciplinary context is considered The second section explores key concepts from birth to adulthood exploring the nature of intellectual disability the child with intellectual disability and other related neurodevelopmental conditions The third section explores adulthood to older age and considers specific health care needs understanding behaviour and other fundamental concepts including mental health ageing and palliative care The fourth and final section explores the integration of health and social care addressing such issues as supporting and enabling families education employment and sexuality and relationships Edited by experienced and widely respected professionals this textbook is written by international practitioners educators and researchers who all play critical roles in working with individuals with intellectual disability and their families

Person-centred Nursing Research: Methodology, Methods and Outcomes Jan Dewing, Brendan McCormack, Tanya McCance, 2021-04-26 This book is the first ever to offer a contemporary collection of different perspectives on person centredness in international doctoral nursing research The research in the book is based on the ideas and values of personhood and person centeredness which have been used and can be seen to guide research approaches inform research designs and theorize research findings Further a specific framework for person centred nursing is embedded throughout the research studies presented in the text The Person centred Nursing Framework PCNF developed by Brendan McCormack and Tanya McCance in 2010 is recognized as a nursing theory and this book further develops it as a basis for research and for advancing person centredness in nursing The framework informs all stages of the research process from design through to dissemination The book is structured into a number of highly engaging chapters written by doctoral candidates and recently graduated candidates The opening and closing chapters written by the editors place the subsequent chapters in a global context of person centredness and nursing The potential for person centred nursing research to be a global movement is recognized and debated The subsequent chapters lead readers through philosophical ideas methodologies and methods whilst also offering reflective and honest insights into learning how to become a person centred researcher This field is growing and developing but yet there is no specific book available As a result researchers spend considerable time and effort translating existing research methodologies into person centred perspectives This book fills this gap and acts as a key resource for future nurse researchers The text is intended for and benefits nursing doctoral candidates masters candidates and academic staff who teach and supervise research candidates it may also appeal to other graduate learners The book has international contributions which makes it appealing internationally div

**A Textbook of Community Nursing** Sue Chilton, Heather Bain, 2024-12-23 This third edition is a comprehensive and evidence based introduction to this essential area of practice Fully updated to take into account the wide range of nursing roles in the community it provides an integrated approach to care with a focus on physical and mental wellbeing It covers a wide range of topics including research and

community nursing public health professional approaches to care risk management safeguarding therapeutic relationships care across the lifespan community nursing assessment mental health carers and families spirituality leading person centred care and digital healthcare Incorporating current theory policy and guidelines for practice and underpinned by a strong evidence base each chapter features learning objectives and activities Case studies and examples from practice serve to illustrate the practical application of theory throughout This is an essential text for all pre registration nursing students students on post registration specialist community nursing courses and qualified nurses entering community practice for the first time **Giddens's Concepts for Canadian Nursing Practice - E-Book** Debra (Debbie)
