Causation, Physics, and the Constitution of Reality Huw Price, Richard Corry, 2007. In philosophy as in ordinary life, cause and effect are twin pillars on which much of our thought seems based. But almost a century ago, Bertrand Russell declared that modern physics leaves these pillars without foundations. Russell's revolutionary conclusion was that the law of causality is a relic of a bygone age, surviving like the monarchy only because it is erroneously supposed to do no harm. Russell's famous challenge remains unanswered. Despite dramatic advances in physics, the intervening century has taken us no closer to an explanation of how to find a place for causation in a world of the kind that physics reveals. In particular, we still have no satisfactory account of the directionality of causation: the difference between cause and effect and the fact that causes typically precede their effects. In this important collection of new essays, 13 leading scholars revisit Russell's revolution in search of reconciliation. The connecting theme in these essays is that to reconcile causation with physics, we need to put ourselves in the picture: we need to think about why creatures in our situation should present their world in causal terms.

Gaither's Dictionary of Scientific Quotations Carl C. Gaither, Alma E. Cavazos-Gaither, 2012-01-05. This unprecedented collection of 27,000 quotations is the most comprehensive and carefully researched of its kind, covering all fields of science and mathematics. With this vast compendium, you can readily conceptualize and embrace the written images of scientists, laymen, politicians, novelists, playwrights and poets about humankind's scientific achievements. Approximately 9,000 high-quality entries have been added to this new edition to provide a rich selection of quotations for the student, the educator and the scientist who would like to introduce a presentation with a relevant quotation that provides perspective and historical background on his subject. Gaither's Dictionary of Scientific Quotations, Second Edition, provides the finest reference source of science quotations for all audiences. The new edition adds greater depth to the number of quotations in the various thematic arrangements and also provides new thematic categories.

The Galactic Federation Jason Kurael Varek,2024-11-20 The Galactic Federation Accounts from the Invisible Federation is a bold invitation to push past the limits of human understanding and step into a universe where nothing is as it seems With a gripping and tension

filled narrative the author leads the reader through a dark mysterious and deeply intriguing journey where truth hides beneath layers of silence fear and manipulation Drawing on eyewitness testimonies classified documents and experiences that defy conventional logic this book explores a daring yet incredibly detailed theory about the existence of an intergalactic organization that not only watches over humanity but actively influences its course They call themselves the Galactic Federation and their quiet actions seem deeply intertwined with the recent history of our planet As the accounts pile up the reader begins to notice patterns that can no longer be ignored lights in the sky that defy known physics unofficial agreements between governments and non human entities voices appearing in the minds of ordinary people delivering universal messages and even children describing encounters with glowing beings who guide and protect them None of it feels isolated On the contrary it all points to an ancient secret and organized structure an invisible federation operating in the shadows of our reality But this isn't a work of fiction It's a book built on investigations documented testimonies discarded or suppressed evidence and personal experiences that place the author face to face with something many try to deny the presence of a higher active intelligence among us The discoveries made along this journey are deeply unsettling yet impossible to dismiss And as the files mount it becomes increasingly clear that someone or something is trying to erase the trail The Galactic Federation Accounts from the Invisible Federation doesn't offer easy answers Instead it challenges the reader to think feel and decide for themselves With every page the sense grows that we're being guided toward something greater perhaps even inevitable Initial skepticism gives way to doubt and that doubt becomes a gnawing unease After all what if it's all true More than just a book this is a provocative experience designed for those with the courage to question the status quo and search for answers where few dare to look Get ready to dismantle certainties confront buried secrets and face a parallel universe that might be much closer and more real than we ever imagined Are you ready to face the unknown The truth is waiting but are you ready for it

Rediscoveries and Reformulations Hayward R. Alker, 1996-05-30 This book provides a distinctive and rich conception of methodology within international studies From a rereading of the works of leading Western thinkers about international studies Hayward Alker rediscovers a neo Classical conception of international relations which is both humanistic and scientific He draws on the work of classical authors such as Aristotle and Thucydides modern writers like Machiavelli Vico Marx Weber Deutsch and Bull and post modern writers like Havel Connolly and Toulmin The central challenge addressed is how to integrate positivist or falsificationist research styles within humanistic or interpretive ones The author argues that appropriate philosophically informed reformulations of conventional statistical and game theoretic analyses are possible and describes a number of humanistic methodologies for international relations including argumentation analysis narrative modeling computational models of political understanding and reconstructive analysis
