

# YOUR SUBWOOFER OUTPUT: FILTERED OR UNFILTERED?

Use the "speaker set-up" or "bass management" function of your Dolby Digital processor to select subwoofer as "on" or "yes."

In Dolby® Pro Logic® systems the subwoofer output jack will always be "ON." Connect the subwoofer output jack to the "LFE/Subwoofer" input of the subwoofer. Disconnect the other speakers in the system so that all you can

hear is the subwoofer. Play music or a movie with vocal content. If you can hear and understand the words, your output jack is not filtered; in which case you want to use one of the (line level) "in" jacks on the sub-

woofer itself. If all you can hear is bass, and the vocals are not at all or barely audible, then your subwoofer input jack is filtered and you should use the subwoofer's "LFE/Subwoofer In."

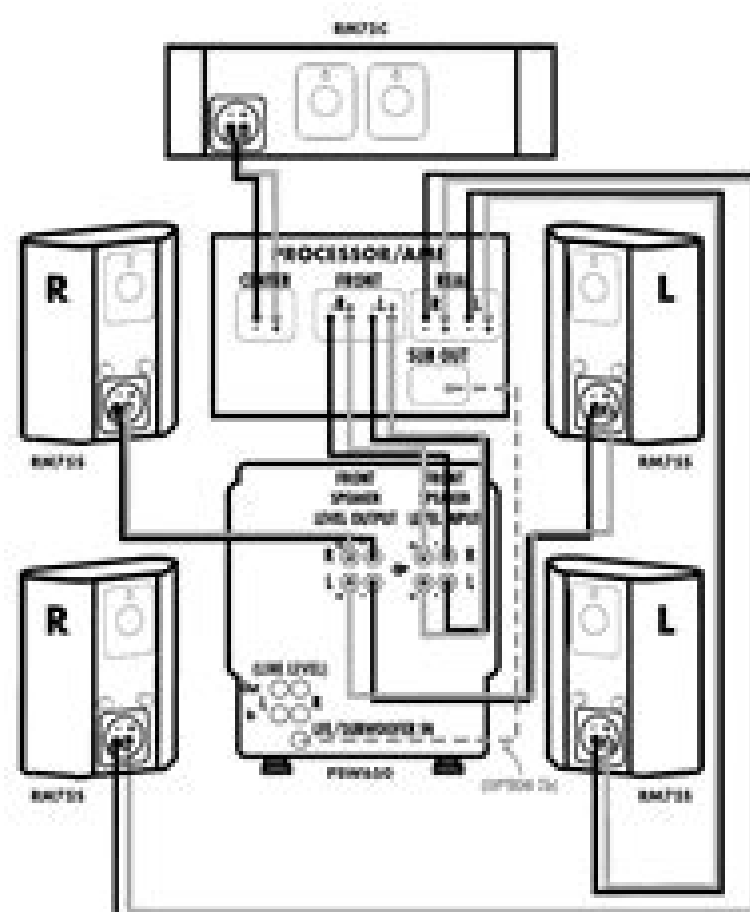

## EASIEST HOOK-UP OPTION

Figure 1: Filtered or Unfiltered? (See Page 4-5)

\* To determine proper input jack for your system, see  
"Your Subwoofer Output: Filtered or Unfiltered?" (above).

Figure 2: Filtered or Unfiltered? (See Page 4-5)
