Fictions of Dementia Susanne Katharina Christ,2022-09-20 Taking its cues from both classical and post classical narratologies this study explores both forms and functions of the representation of dementia in Anglophone fictions Initially dementia is conceptualised as a narrative epistemological paradox The more those affected know what it is like to have dementia the less they can tell about it Narrative fiction is the only discourse that provides an imaginative glimpse at the subjective experience of dementia in language The narratological modelling of four narrative modes elaborates how the paradox becomes productive in fiction Depending on the narrative perspective taken but also on the type of narration the technique for representing consciousness and the epistemic strategy of narrating dementia the respective narrative modes come with different prerequisites and possibilities for narrating dementia The analysis of four contemporary Anglophone dementia fictions based on the developed model reveals their potential functions Fiction allows readers to learn about the challenges of dementia grants them perspective taking it trains cognitive flexibility and explores the meaning of memory knowledge narrative and imagination and thus also offers trajectories of a cultural coping with dementia

and therapy have had any effect on the fact that attitudes against the elderly are based on patterns that are determined by parameters that are not biological or sociological. Ageing is also a cultural fact. This book reveals the importance of cultural factors in order to build a framework for analyzing and understanding cultural constructions of ageing, bringing together scholarly discourses from the arts and humanities as well as social, medical and psychological fields of study. The contributions pave the way for new strategies of caring for elderly people.

A Poetic Language of Ageing Olga V. Lehmann, Oddgeir Synnes, 2023-05-18 Exploring the potential of poetry and poetic language as a means of conveying perspectives on later life, this book examines questions such as how can we understand ageing and later life and how can we capture the ambiguities and complexities that the experiences of growing old in time and place entail. As poetic language illuminates, transfigures and enchants our being in the world, it also offers insights into the existential questions that are amplified as we age, including the vulnerabilities and losses that humble us and connect us. This volume suggests a path towards the poetics of ageing by means of presenting analyses of published poetry on ageing, ranging from William Shakespeare to George Oppen, the use of reading and writing poetry among lay people in old age, including persons living with dementia, and the poetic nuances that emerge from other literary practices and contexts in relation to ageing, counting personal poetic reflections from many of the contributing authors.

Successful Aging as a Contemporary Obsession Sarah Lamb, 2017-05-22 In recent decades the North American public has pursued an inspirational vision of successful aging, striving through medical technique and individual effort to eradicate the declines, vulnerabilities and dependencies previously commonly associated with old age. On the face of it, this bold new vision of successful, healthy and active aging is highly appealing. But it also rests on a deep cultural discomfort with aging and being old. The contributors to *Successful Aging as a Contemporary Obsession* explore how the successful aging movement is playing out across five continents. Their chapters investigate a variety of people, including Catholic nuns in the United States, Hindu ashram dwellers, older American women seeking plastic surgery, aging African American lesbians and gay men in the District of Columbia, Chicago home health care workers and their aging clients, Mexican men foregoing Viagra, dementia and Alzheimer sufferers in the United States and Brazil, and aging policies in Denmark, Poland, India, China, Japan and Uganda. This book offers a fresh look at a major cultural and public health movement of our time, questioning what has become for many a taken-for-granted goal: aging in a way that almost denies aging itself.
