Public Health Service, 1967 **Published Scientific Papers of the National Institutes of Health** National Institutes of Health (U.S.), 1965 Presents the broad outline of NIH organizational structure the professional staff and their scientific and technical publications covering work done at NIH **Other Ways of Growing Old** Pamela T. Amoss, Stevan Harrell, 1981 As anthropologists we offer this book about aging in a wide variety of human societies in the hope of its making three contributions First this book will help to remedy a massive neglect of old age by the

discipline of anthropology The pioneering work of Leo Simmons 1945 has remained a lonely monument since the 1940 s for despite recent interest in the subject of aging in modern Western societies on the part of social gerontologists and sociologists little has been done by anthropologists on aging in non Western societies Where it has been treated at all it has been in the form either of a few final paragraphs in the discussion of the life cycle or of a simple ethnographic fact among other facts about a certain social system What has been missing has been any attempt to put aging in a cross cultural or comparative perspective to give this vital subject the same treatment that has been accorded marriage for example or death or inheritance or sex roles Second this book will bring a needed cross cultural perspective to the study of social gerontology The recent explosion of interest in this field has been largely confined to the study of aging in North America and Europe But we anthropologists feel that such a culturally limited study though interesting and productive in its own right is dangerously narrow if it does not consider what aging is like in other societies What aspects of aging for example are human universals and have to be planned for as inevitable and what aspects are cultural particulars and can be avoided modified or strengthened under certain social conditions By presenting both a biological account of the universals of human aging Weiss and specific ethnographic accounts of aging in a wide variety of societies we believe we can help to put North American aging into perspective Third we hope this book will serve as an illustration of a particular anthropological approach to unity and diversity in human societies and cultures Perhaps the main task of sociocultural anthropology is a twofold one the explanation of cross cultural universals somehow rooted either in the biological nature of the human species or in universal imperatives of social organization and the explanation of intercultural variations rooted in a dialectical interaction between culture and the material conditions partially created by culture in which it exists If unity and diversity can indeed be explained in this way the cross cultural study of aging can serve as a paradigm By first setting out what seem to be the universals determined by the biology of the human species and by then exploring the range of variation in cultural solutions we ought to be able to formulate a set of principles that will allow us to explain why variations occur in a certain way Nine ethnographic case studies are enough we believe to enable us to formulate some preliminary hypotheses about the nature and causes of variation in the social process of aging The Michigan Alumnus ,1982 In volumes1 8 the final number consists of the Commencement annual **Growing Old in America** Beth B. Hess,Elizabeth Warren Markson, Modern industrial societies are characterized by long term declines in fertility and steady increases in life expectancy Together these trends result in an aging population The United States is no exception since 1969 the median age has risen from 29 4 to a projected 36 4 in the year 2000 This fourth edition of the standard reader on the sociology of aging has been completely revised with 90 percent new material to reflect new information and new issues in this rapidly developing field Students and practicing professionals will find it a lively accessible overview Current Catalog National Library of Medicine (U.S.), First multi year cumulation covers six years 1965 70 **Schizophrenia Bulletin** ,1992 **Stress and Old Age** Wilbur

National Advisory Mental Health Council,1991 Bridging the Gap Between Practice and Research Institute of Medicine,Committee on Community-Based Drug Treatment,1998-09-11 Today most substance abuse treatment is administered by community based organizations If providers could readily incorporate the most recent advances in understanding the mechanisms of addiction and treatment the treatment would be much more effective and efficient The gap between research findings and everyday treatment practice represents an enormous missed opportunity at this exciting time in this field Informed by real life experiences in addiction treatment including workshops and site visits Bridging the Gap Between Practice and Research examines why research remains remote from treatment and makes specific recommendations to community providers federal and state agencies and other decision makers The book outlines concrete strategies for building and disseminating knowledge about addiction for linking research policy development and everyday treatment implementation and for helping drug treatment consumers become more informed advocates In candid language the committee discusses the policy barriers and the human attitudes the stigma suspicion and skepticism that often hinder progress in addiction treatment The book identifies the obstacles to effective collaboration among the research treatment and policy sectors evaluates models to address these barriers and looks in detail at the issue

Walking Prey Holly Austin Smith, 2024-09-04 Today two cultural forces are converging to make America's youth easy targets for sex traffickers Younger and younger girls are engaging in adult sexual attitudes and practices and the pressure to conform means thousands have little self worth and are vulnerable to exploitation At the same time thanks to social media texting and chatting services predators are able to ferret out their victims more easily than ever before In *Walking Prey* advocate and former victim Holly Austin Smith shows how middle class suburban communities are fast becoming the new epicenter of sex trafficking in America Smith speaks from experience Without consistent positive guidance or engagement Holly was ripe for exploitation at age fourteen A chance encounter with an older man led her to run away from home and she soon found herself on the streets of Atlantic City Her experience led her two decades later to become one of the foremost advocates for trafficking victims Smith argues that these young women should be treated as victims by law enforcement but that too often the criminal justice system lacks the resources and training to prevent the vicious cycle of prostitution This is a clarion call to take a sharp look at one of the most striking human rights abuses and one that is going on in our own backyard
