Kyriakopoulos, 2024-02-13 For the second year in a row we are very happy to offer our readership an ebook of 10 articles that have achieved widespread acceptance within our core audience and beyond This time it concerns articles published in 2023 a landmark year for this journal as it was officially awarded its first impact factor These papers are among the large number that attained significant interest last year but we selected just 10 which we consider to be the best These articles have already made an impact in the form of original research or comprehensive reviews As the Field Chief Editor I would like to stand alongside our journal staff to honor all authors who contributed very high level papers to the journal last year and are contributing to our success We also thank the editors and reviewers of these papers and of all papers this past year for their invaluable contribution **Applications of Power Electronics** Frede Blaabjerg, Tomislav Dragicevic, Pooya Davari, 2019-06-24 Power electronics technology is still an emerging technology and it has found its way into many applications from renewable energy generation i.e. wind power and solar power to electrical vehicles EVs biomedical devices

and small appliances such as laptop chargers In the near future electrical energy will be provided and handled by power electronics and consumed through power electronics this not only will intensify the role of power electronics technology in power conversion processes but also implies that power systems are undergoing a paradigm shift from centralized distribution to distributed generation Today more than 1000 GW of renewable energy generation sources photovoltaic PV and wind have been installed all of which are handled by power electronics technology The main aim of this book is to highlight and address recent breakthroughs in the range of emerging applications in power electronics and in harmonic and electromagnetic interference EMI issues at device and system levels as discussed in robust and reliable power electronics technologies including fault prognosis and diagnosis technique stability of grid connected converters and smart control of power electronics in devices microgrids and at system levels

Autonomous Control of Unmanned Aerial Vehicles

Victor Becerra,2019-06-24 Unmanned aerial vehicles UAVs are being increasingly used in different applications in both military and civilian domains These applications include surveillance reconnaissance remote sensing target acquisition border patrol infrastructure monitoring aerial imaging industrial inspection and emergency medical aid Vehicles that can be considered autonomous must be able to make decisions and react to events without direct intervention by humans Although some UAVs are able to perform increasingly complex autonomous manoeuvres most UAVs are not fully autonomous instead they are mostly operated remotely by humans To make UAVs fully autonomous many technological and algorithmic developments are still required For instance UAVs will need to improve their sensing of obstacles and subsequent avoidance This becomes particularly important as autonomous UAVs start to operate in civilian airspaces that are occupied by other aircraft The aim of this volume is to bring together the work of leading researchers and practitioners in the field of unmanned aerial vehicles with a common interest in their autonomy The contributions that are part of this volume present key challenges associated with the autonomous control of unmanned aerial vehicles and propose solution methodologies to address such challenges analyse the proposed methodologies and evaluate their performance

Monitoring endogenous GPCRs: lessons for drug design Dominique Massotte, 2015-10-07 G protein coupled receptors GPCRs are integral membrane proteins forming the fourth largest superfamily in the human genome Many of these receptors play key physiological roles and several pathologies have been associated with receptor functional abnormalities

GPCRs therefore represent important goals for drug design in pharmaceutical companies since they constitute the target of about one third of the drugs currently on the market. However, endogenous GPCRs are most often difficult to study because of a lack of tools to target them specifically and single out their response to physiological or drug elicited stimulations. Hence, studies mostly focused on recombinant receptors expressed in a variety of cellular models that do not always closely reflect the receptor natural environment and often deal with levels of expression exceeding by far physiological ranges. Recent technological developments combining for example genetically modified animals and advanced imaging approaches have improved our ability to visualize endogenous GPCRs. To date, trailing receptor activation subsequent intracellular redistribution changes in signaling cascade up to integrated response to a drug elicited stimulation is at hand, though the impact of a physiological challenge on receptor dynamics remains a major issue. Data however suggest that the receptor may embrace a different fate depending on the type of stimulation in particular if sustained or repeated. This suggests that current drugs may only partially mimic the genuine response of the receptor and may explain at least in part their secondary effects. Commonalities and specificities between physiological and drug induced activation can thus represent valuable guidelines for the design of future drugs.

The proceedings of the 16th Annual Conference of China Electrotechnical Society Qingxin Yang, Xidong Liang, Yaohua Li, Jinghan He, 2022-04-17. This book gathers outstanding papers presented at the 16th Annual Conference of China Electrotechnical Society organized by China Electrotechnical Society CES held in Beijing, China from September 24 to 26, 2021. It covers topics such as electrical technology, power systems, electromagnetic emission technology, and electrical equipment. It introduces the innovative solutions that combine ideas from multiple disciplines. The book is very much helpful and useful for the researchers, engineers, practitioners, research students, and interested readers.

Mathematical Optimization Theory and Operations Research: Recent Trends Anton Ereemeev, Michael Khachay, Yury Kochetov, Vladimir Mazalov, Panos Pardalos, 2024-12-19. This book constitutes the revised selected papers from the 23rd International Conference on Mathematical Optimization Theory and Operations Research MOTOR 2024 held in Omsk, Russia from June 30 to July 06, 2024. The 26 full papers included in this book were carefully reviewed and selected from 79 submissions. These papers have been organized in the following topical sections: Mathematical programming, Combinatorial optimization, Operations research, and Machine learning and optimization.

Molecular mechanisms of cellular stress responses in cancer and their therapeutic implications Megan Chircop, Daniel Speidel, 2015-03-06. In response to stress, cells can activate a myriad of signalling pathways to bring about a specific cellular outcome including cell cycle arrest, DNA repair, senescence, and apoptosis. This response is pivotal for tumour suppression as all of these outcomes result in restriction of the growth and or

elimination of damaged and pre malignant cells Thus a large number of anti cancer agents target specific components of stress response signalling pathways with the aim of causing tumour regression by stimulating cell death However the efficacy of these agents is often impaired due to mutations in genes that are involved in these stress responsive signalling pathways and instead the oncogenic potential of a cell is increased leading to the initiation and or progression of tumourigenesis Moreover these genetic defects can increase or contribute to resistance to chemotherapeutic agents and or radiotherapy Modulating the outcome of cellular stress responses towards cell death in tumour cells without affecting surrounding normal cells is thus one of the ultimate aims in the development of new cancer therapeutics To achieve this aim a detailed understanding of cellular stress response pathways and their aberrations in cancer is required This Research topic aims to reflect the broadness and complexity of this important area of cancer research *Proceedings of the Second International Conference on Soft Computing for Problem Solving (SocProS 2012), December 28-30, 2012* B.
