

These self-reported behaviors were measured through four self-administered scales to assess perceived drinking habits. Because binge drinking was the focus of the study, the first three self-rated measures focused on the ability to abstain from drinking. The self-rated categories in these constructs, respectively, were abstaining from any alcohol consumption and abstaining from all alcohol consumption. After being classified into one of these two categories, they were then asked whether they had the opportunity to drink their beverage for the past week. They then indicated whether they had consumed alcohol during the past week. The self-rated categories were abstaining
