G. Balme, James Morwood, 2012 This text follows a reading based approach covering all the topics essential to a first year Latin course at an American college *Humanism, English Literature, and the Translation of Greek, 1430-1560* John Colley, 2025-04-10 Humanism English Literature and the Translation of Greek 1430-1560 is the first study to trace the influence of the Quattrocento rebirth of Greek scholarship on fifteenth and sixteenth century English literature It begins with the first signs of humanist Greek in England in and around Duke Humfrey's circle at a time when no English writer could claim significant Greek literacy It ends on the cusp of Elizabethan literary culture when English writers much more frequently translated Ancient Greek into both Latin and the vernacular This period witnessed a surge in the translation of Greek It also witnessed changing beliefs about how and why Greek should be translated at all especially under the growing pressures of the Reformation Building on scholarship in the fields of classical reception translation studies and intellectual history the volume argues that attending to the period's ideas about Greek translation fundamentally alters our perception of Tudor humanism and the classical tradition more widely In linking biblical and patristic translation with the translation of works by pagan authors the book shows that Renaissance humanism was less secular and more wide ranging in its goals and interest than the standard scholarly narrative has claimed By showing continuities between late medieval and early modern literature it further revises arguments for the novelty of the sixteenth century humanists The book ultimately

argues that fifteenth and sixteenth century English writers experienced a contradictory relationship to Greek Desire for the language and what it stood for was tempered by the realities of its mediated transmission Desire for Greek was also undercut by the sectarian divisions that the language came to reflect and magnify

**Roman Theories of Translation** Siobhán McElduff, 2013-08-29 For all that Cicero is often seen as the father of translation theory his and other Roman comments on translation are often divorced from the complicated environments that produced them The first book length study in English of its kind *Roman Theories of Translation Surpassing the Source* explores translation as it occurred in Rome and presents a complete culturally integrated discourse on its theories from 240 BCE to the 2nd Century CE Author Siobhán McElduff analyzes Roman methods of translation connects specific events and controversies in the Roman Empire to larger cultural discussions about translation and delves into the histories of various Roman translators examining how their circumstances influenced their experience of translation This book illustrates that as a translating culture a culture

reckoning with the consequences of building its own literature upon that of a conquered nation and one with an enormous impact upon the West Rome's translators and their theories of translation deserve to be treated and discussed as a complex and sophisticated phenomenon Roman Theories of Translation enables Roman writers on translation to take their rightful place in the history of translation and translation theory [Medieval Philosophy](#) John Marenbon, 2006-10-02 Updated to include recent research in the field this exploration of medieval philosophy looks at the subject's history techniques and concepts Discussing the main writers and ideas it is the standard companion for all students of the discipline **JACT Review**, 2000 **The Blackwell History of the Latin Language** James Clackson, Geoffrey Horrocks, 2011-05-23 This text makes use of contemporary work in linguistics to provide up to date commentary on the development of Latin from its prehistoric origins in the Indo European language family through the earliest texts to the creation of the Classical Language of Cicero and Vergil and examines the impact of the spread of spoken Latin through the Roman Empire The first book in English in more than 50 years to provide comprehensive coverage of the history of the Latin language Gives a full account of the transformation of the language in the context of the rise and fall of Ancient Rome Presents up to date commentary on the key linguistic issues Makes use of carefully selected texts many of which have only recently come to light Includes maps and glossary as well as fully translated and annotated sample texts that illustrate the different stages of the language Accessible to readers without a formal knowledge of Latin or linguistics *Actions and Objects from Hobbes to Richardson* Jonathan Kramnick, 2010-08-30 How do minds cause events in the world How does wanting to write a letter cause a person's hands to move across the page or believing something to be true cause a person to make a promise In *Actions and Objects* Jonathan Kramnick examines the literature and philosophy of action during the late seventeenth and early eighteenth centuries when philosophers and novelists poets and scientists were all concerned with the place of the mind in the world These writers asked whether belief desire and emotion were part of nature and thus subject to laws of cause and effect or in a special place outside the natural order Kramnick puts particular emphasis on those who tried to make actions compatible with external determination and to blur the boundary between mind and matter He follows a long tradition of examining the close relation between literary and philosophical writing during the period but fundamentally revises the terrain Rather than emphasizing psychological depth and interiority or asking how literary works were understood as true or fictional he situates literature alongside philosophy as jointly interested in discovering how minds work [Old Penn](#), 1913 *Knowledge in Translation* Patrick Manning, Abigail Owen, 2018-09-19 In the second millennium CE long before English became the language of science in the twentieth century the act of translation was crucial for understanding and disseminating knowledge and information across linguistic and geographic boundaries This volume considers the complexities of knowledge exchange through the practice of translation over the course of a millennium across fields of knowledge cartography health and medicine material construction astronomy and a wide geographical range from Eurasia to Africa and the Americas Contributors literate in

**Inquisitors and Heretics in Thirteenth-Century Languedoc** Peter Biller, Caterina Bruschi, Shelagh Sneddon, 2010-11-19 In the study of inquisition and heresy in Languedoc the late thirteenth century is a dark hole This book redresses this providing an edition and translation of depositions of heresy suspects interrogated in Toulouse 1273 82 preserved in a copy of 1669 The book's introduction investigates the history and reliability of this copy and together with the edition illuminates the inquisitors and scribes who produced the original register The edited text shows a Cathar hierarchy in exile in Italy a Cathar revival in Languedoc and its destruction by a re launched inquisition Inquisitors questioning led to depositions which are extraordinarily colourful and lively and in this they anticipate the circumstantial detail of the early fourteenth century depositions upon which Le Roy Ladurie's famous Montaignou was based
