Engineering Education ,1977 **Previews of Heat and Mass Transfer** ,1992 Modeling with Differential Equations in Chemical Engineering Stanley M. Walas,1991 Modelling with Differential Equations in Chemical Engineering covers the modelling of rate processes of engineering in terms of differential equations While it includes the purely mathematical aspects of the solution of differential equations the main emphasis is on the derivation and solution of major equations of engineering and applied science Methods of solving differential equations by analytical and numerical means are presented in detail with many solved examples and problems for solution by the reader Emphasis is placed on numerical and computer methods of solution A key chapter in the book is devoted to the principles of mathematical modelling These principles are applied to the equations in important engineering areas The major disciplines covered are thermodynamics diffusion and mass transfer heat transfer fluid dynamics chemical reactions and automatic control These topics are of particular value to chemical engineers but also are of interest to mechanical civil and environmental engineers as well as applied scientists The material is also suitable for undergraduate and beginning graduate students as well as for review by practising engineers **Heat Conduction** David W. Hahn,M. Necati Özisik,2012-08-20 HEAT CONDUCTION Mechanical Engineering THE LONG AWAITED REVISION OF THE BESTSELLER ON HEAT CONDUCTION Heat Conduction Third Edition is an update of the classic text on heat conduction replacing some of the coverage of numerical methods with content on micro and nanoscale heat transfer With an emphasis on the mathematics and underlying physics this new edition has considerable depth and analytical rigor providing a systematic framework for each solution scheme with attention to boundary conditions and energy conservation Chapter coverage includes Heat conduction fundamentals Orthogonal functions boundary value problems and the Fourier Series The separation of variables in the rectangular coordinate system The separation of variables in the cylindrical coordinate system The separation of variables in the spherical coordinate system Solution of the heat equation for semi infinite and infinite domains The use of Duhamel s theorem The use of Green s function for solution of heat conduction The use of the Laplace transform One dimensional composite medium Moving heat source problems Phase change problems Approximate analytic methods Integral transform technique Heat conduction in anisotropic solids Introduction to microscale heat conduction In addition new capstone examples are included in this edition and extensive problems cases and examples have been thoroughly updated A solutions manual is also available Heat Conduction is appropriate reading for students in mainstream courses of conduction heat transfer students in mechanical engineering and engineers in research and design functions throughout industry *Fundamentals of Heat Transfer* London C.
