of Independent States T. Mickiewicz, 2005-11-11 Fifteen years ago, twenty-seven countries in Europe and Central Asia embarked on their economic transition paths. For some, the outcome was a considerable success. Several others are still struggling to shed the inheritance of the past and to correct more recent policy mistakes. Why were post-Communist recessions so long in some countries and growth disappointing? Why was fiscal performance so different? Was democracy a factor which facilitated reforms or rather slowed them down? This book discusses these questions in the context of new empirical evidence, including a critical examination of the main themes in the economics of transition literature. **The International Political Economy of Transition** Stuart Shields, 2014-10-03 Shortlisted for the 2013 BISA IPEG Book Prize, this book explores how Eastern Europe's post-communist transition can only be understood as part of a broader interrogation of neoliberal hegemony in the global political economy and provides a detailed historical account of the emergence of neoliberalism in Eastern Central Europe. Adopting an innovative Gramscian approach to post-communist transition, this book charts the rise to hegemony of neoliberal social forces. Using transition in Poland as a starting point, the author traces how particular social forces most intimately associated with transnational capital were successful in the struggle over competing reform strategies. Transition is broken down into three stages: the first wave illustrates how the rise of particular social forces shaped by global change gave rise to a neoliberal strategy of capitalism from the 1970s. It goes on to show how the political economy of Europeanization associated with EU enlargement instilled a second wave of neoliberalisation. Finally, exploring recent populist and left-wing alternatives in the context of the current financial crisis, the book outlines how counter-hegemonic struggle might oppose a third wave of neoliberalisation. **The International Political Economy of Transition** will be of interest to students and scholars of international political economy, post-communist studies, and European politics.

Inequalities During and After Transition in Central and Eastern Europe Cristiano Perugini, Fabrizio

Pompei,2015-07-28 The book deals with the key aspects of social and economic inequalities developed during the transition of the formerly planned European economies Particular emphasis is given to the latest years available in order to consider the effects of the global crisis started in 2008 2009 **ECIC2014-Proceedings of the 6th European Conference on Intellectual Capital** Dagmar Cagaňová,Miloš Čambál,2014-10-04 *Entrepreneurship and Economic Transition in Central Europe* Jean-Paul Larçon,2012-12-06 Since the fall of the Berlin Wall in 1989 Central European economies have been moving rapidly toward a common set of goals political democracy market oriented economies and integration into the European and international business community For businesses Central Europe offers a unique window of opportunity and in particular two comparative advantages a low cost qualified workforce and stronger growth rates than mature Western European economies This opportunity seized by local entrepreneurs and foreign enterprises alike is a significant competitive threat to companies not present in the region or who have not found alternative strategies for increased growth and competitiveness This book addresses economic transitions in Central Europe and analyzes the problems of Central European integration in the European Union *Economic Transformation In East-central Europe And In The Newly Independent States* Gabor Hunya,2019-03-13 This book presents the most important areas of economic transformation in East Central Europe It describes the short experience of statehood of the newly independent states and deals with two topical problems of the leading reforming countries with fiscal policy and industrial policy **The American Bibliography of Slavic and East European Studies** Patt Leonard,Rebecca Routh,2020-02-27 This bibliography first published in 1957 provides citations to North American academic literature on Europe Central Europe the Balkans the Baltic States and the former Soviet Union Organised by discipline it covers the arts humanities social sciences life sciences and technology **The Political Economy of the Eurozone in Central and Eastern Europe** Krisztina Arató,Boglarka Koller,Anita Pelle,2021-06-30 The idea for this volume came from the enigma that some Central and Eastern European CEE European Union EU member states have been keen to join the Eurozone while others have shown persistent reluctance Moreover the attitudes towards joining have seemingly not correlated with either the level of economic development or the time spent as part of the EU nor with any other rational reason such as the level of integration into the EU real economy or the level of trust in the EU on the part of the public Therefore at first sight the answer to the question why in why out remains rather unclear The attractiveness of the currency union has nevertheless not disappeared for the CEE countries Despite the Eurozone crisis of 2010 13 it was during that time that the Baltic states introduced the euro Then after a few years of inactivity Croatia and Bulgaria successfully applied for membership of the exchange rate mechanism in July 2020 amid the economic crisis caused by the coronavirus COVID 19 pandemic At the same time the three Visegrad countries still using their national currencies Poland Czechia and Hungary no longer have a target date to join the monetary union This volume aims to discuss these issues from horizontal aspects and through country studies with contributions from expert authors from or closely related to the CEE region

Global Long-term Economic Growth and the Economic Transformation of Poland and Eastern Europe Stanisław Gomułka, 2023. One of the characteristic facts concerning the catching up countries is the exceptionally large variation in their per capita annual rate of growth, from about zero to about 10%. The papers published in this monograph show that this rate is strongly dependent on the rate of investment, the quality of the labour force, and the quality of institutions. The rate of investment is in turn dependent on the rate of domestic savings. In Poland, domestic savings are shown to have been and continue to be very low by international standards. The trend rate of growth of about 3.7% has been about 2 pp higher than that of the most developed economies, mainly thanks to the development of modern market institutions and a new private sector, and partly thanks to foreign direct investments and a significant inflow of finance from the European Union (EU). The data also show that by far the least successful transformation in Eastern Europe has taken place in Ukraine. **Author's Introduction.** Our discussion is limited to the Technology Frontier Area (TFA) of the world. The central question is how the area's innovation rate changes over time in the course of centuries. The analysis indicates that the pattern of change of the innovation rate over time may be eventually hat-shaped. This Hat Shape Relationship is an empirical law that is given a theoretical interpretation. It is in part a prediction based on the author's model of innovation and growth. Its acceleration and steady growth segments correspond well to the past reality. Its slowdown part is the central thesis of the book. Politics and Society in Poland Frances Millard, 2002-09-11. Backwardness and Modernization: Poland and Eastern Europe in the 16th-20th Centuries Jacek Kochanowicz, 2018-01-31 The subject of this book is the economic backwardness of Poland and Eastern Europe in the modern era The studies in the first part analyse various aspects of the region's economic and social history in the period from the 16th to the 20th centuries such as the nature of peasant economics the character of economic evolution and the ambiguity of social and economic relations between Poland and the West The second part deals with the change following the fall of state socialism Papers in this part argue that for understanding the present it is necessary to take into consideration historical legacies It is also important to look at the process of this recent change comparatively both within Eastern Europe and comparing this region with other parts of the world Professor Kochanowicz's contention in these essays is that the so called transformation has had to cope not only with the effects of state socialism but also with a much longer legacy of backwardness
