Statistical concepts such as standard errors or confidence intervals are not taught before you learn properties of sampling distributions. In fact, it's important to first understand the concept of a sampling distribution before you can understand the concept of a confidence interval. The concept of a sampling distribution is the concept of a distribution of sample means. The concept of a confidence interval is the concept of a range of values that are likely to contain the true population mean. The concept of a standard error is the concept of the standard deviation of the sampling distribution of the sample mean.
