electronics field One of Devol's patent applications referred to a Programmed Transfer Article Devol's patent was issued in 1961 as US Patent 2 988 237 and this formed the basis of the Unimate robot which first saw the light of day in 1960 The first Unimate was sold to Ford Motor Company which used it to tend a die casting machine It is perhaps ironic that the first robot was used by a company which refused to recognise the machine as a robot preferring instead to call it a Universal Transfer Device    *Embedded Robotics* Thomas Bräunl,2022-03-23 This book presents a unique examination of mobile robots and embedded systems from introductory to intermediate level It is structured in three parts dealing with Embedded Systems hardware and software design actuators sensors PID control multitasking Mobile Robot Design driving balancing walking and flying robots and Mobile Robot Applications mapping robot soccer genetic algorithms neural networks behavior based systems and simulation The book is written as a text for courses in computer science computer engineering IT electronic engineering and mechatronics as well as a guide for robot hobbyists and researchers    *Loving the Machine* Timothy N.
