69th AACC Annual Scientific Meeting Abstract eBook American Association for Clinical Chemistry, 2017-06-30 *Quality Control in the age of Risk Management, An Issue of Clinics in Laboratory Medicine* James O. Westgard, Sten Westgard, 2013-03-28 In October of 2011 CLSI published a new guideline EP23A on Laboratory Quality Control Based on Risk Management In March 2012 CMS announced its intention to incorporate key concepts from EP23A into its Interpretative Guidelines and QC policy for Individualized Quality Control Plans Thus begins a new era of Quality Control in the Age of Risk Management This issue is intended to help laboratories with the transition between traditional QC practices and the new risk management approach Laboratories face a steep learning curve to apply risk analysis for identifying and prioritizing failure modes developing and implementing control mechanisms to detect those failure modes and assessing the acceptability of the residual risks that exist after implementation of a QC Plan One of the main benefits of the new risk analysis based QC Plans should be an integration of all the control mechanisms that are needed to monitor the total testing process including pre analytic analytic and post analytic controls One of the main risks of the new approach is an expectation that Statistical QC is no longer important even though SQC still remains the most useful and flexible approach for monitoring the quality of the analytic process The key to the future is the successful integration of all these control mechanisms to provide a cost effective quality system that monitors all phases of the total testing process This issue should help laboratories understand the evolution of QC practices to include risk management but also to recognize the need to maintain traditional techniques such as Statistical QC especially during the transition to well designed and carefully validated QC Plans Risk analysis may be risky business unless laboratories proceed carefully and cautiously **Clinical Management of Pulmonary Disorders and Diseases** Mieczyslaw Pokorski, 2017-10-30 The book endeavors to provide a stimulating and thought provoking scientific content to share and exchange new clinical studies and advancements in dealing with pulmonary diseases The topics vary from clinical to translational research in respiratory diseases such as lung cancer obstructive sleep apnea chronic obstructive pulmonary disease bacterial and fungal infections lung lesions during febrile maladies and others An attempt has been made to show the intertwined relationship between the pulmonary system and other body systems such as kidney cardiac or hormonal functions The ensuing interlocked morbidities often exacerbating one another require the coordination of various medical specialties to optimize the diagnostic and therapeutic processes The knowledge sharing through publications of research and clinical experiences is indispensable to accelerate the innovation spectrum and to continue working on the therapeutic and preventive strategies in chronic pulmonary diseases The book is addressed to pulmonologists chest physicians researchers and healthcare professionals engaged in patient care **Nano-Enabled Medical Applications** Lajos P. Balogh, 2020-11-23 This book is the second in a series presenting articles that received the most citations in recent years in nanomedicine The series is edited by a prominent nanotechnology researcher and editor in chief of Precision

Nanomedicine The theme of the second volume is about nano enabled medical applications The 19 articles collected here have already acquired more than 12 500 citations highlighting the importance and professional recognition of the work of these scientists in nanomedicine The content includes the general overview of the field and a wide variety of applications that have been impossible without nanoscience and nanotechnology **Recent Advances in Gestational Diabetes Mellitus**

Guoju Li,Zhanhui Du ,Yanhui Lu,2024-06-24 Gestational diabetes mellitus is one of the most common pregnancy related complications Gestational diabetes mellitus poses a significant threat to maternal health and offspring development including shoulder dystocia preterm birth maternal hypertension and ischemic heart disease constituting a major public health crisis Given the serious adverse outcomes of gestational diabetes mellitus there is an urgent need to further explore new prediction tools of early pregnancy The exact reasons for the development of gestational diabetes mellitus remain inconclusive Pathological mechanisms underlying gestational diabetes mellitus have been mainly attributed to cell impairment However the underlying mechanisms of gestational diabetes mellitus have not been elucidated In identifying risk factors and biomarkers in early pregnancy can provide more basis for clinical diagnosis of gestational diabetes mellitus in the future
