Economic Evaluation in Education Henry M. Levin, Patrick J. McEwan, Clive Belfield, A. Brooks Bowden, Robert Shand, 2017-06-15 The past decade has seen increased attention to cost effectiveness and benefit cost analysis in education as administrators are being asked to accomplish more with the same or even fewer resources philanthropists are keen to calculate their return on investment in social programs and the general public is increasingly scrutinizing how resources are allocated to schools and colleges This text titled Cost Effectiveness Analysis in its previous editions is the only full length

book to provide readers with the step by step methods they need to plan and implement a benefit cost analysis in education The authors examine a range of issues including how to identify measure and distribute costs how to measure effectiveness utility and benefits and how to incorporate cost evaluations into the decision making process The updates to the Third Edition reflect the considerable methodological development in the evaluation literature and the greater empiricism practiced by education researchers to help readers learn to apply more advanced methods to their own analyses SAGE congratulates author Henry M Levin winner of the 2017 AERA Distinguished Contributions to Research in Education Award
