## **Pat Tourism 2014:**

Innovation Strategies and Organizational Culture in Tourism Marco Valeri, 2024-02-06 This book analyzes the importance of innovation as the key driver of sustained success in the tourism industry and the knowledge sharing process. It explores its impact on innovation capability and innovation performance of organizations. With 12 chapters written by 22 contributors, the book offers international reflections. The first part of the book focuses on innovation management strategies and analyzes the importance of innovation as the key driver of sustained success in the tourism industry. Tourism and hospitality firms develop innovations with specific objectives and goals in mind and have several approaches to measure performance accordingly. The second part of the book focuses on knowledge sharing through case studies. Chapters analyze the knowledge sharing process and its impact on the innovation capability and innovation performance of the firms. The essence of knowledge sharing is to provide a framework for management in their attempt to develop and enhance their organizational capability to innovate in tourism. This invaluable book provides both theoretical and practical insights into innovation strategies and knowledge sharing in tourism. It will interest students, scholars and researchers as well as executives and practitioners in the field of tourism and hospitality management. *Information and Communication Technologies in Tourism 2014* Zheng Xiang, Iis Tussyadiah, 2014-01-08 The papers presented in this volume advance the state of the art research on social media and Web 2.0, electronic tourism marketing, website development and evaluation, search engine marketing and optimization, IT adoption and diffusion, virtual travel communities, mobile technologies, management information systems in tourism, eLearning, recommender systems for tourism businesses and destinations, and electronic distribution for hospitality and travel products. This book covers the most significant topics contributed by prominent scholars from around the world and is suitable for both academics and practitioners who are interested in the latest developments in eTourism. **Tourism Destination Evolution** Patrick Brouder, Salvador Anton Clavé, Alison Gill, Dimitri Ioannides, 2016-07-15 Outlining the need for fresh perspectives on change in tourism, this book offers a theoretical overview and empirical examples of the potential synergies of applying evolutionary economic geography (EEG) concepts in tourism research. EEG has proven to be a powerful explanatory paradigm in other sectors, and tourism studies has a track record of embracing adapting and enhancing frameworks from cognate fields. EEG approaches to tourism studies complement and further develop studies of established themes such as path dependence and the Tourism Area Life Cycle. The individual chapters draw from a broad geographical framework and address distinct conceptual elements of EEG using a diverse set of tourism case studies from Europe, North America, and Australia. Developing the theoretical cohesion of tourism and EEG, this volume also gives non-specialist tourism scholars a window into the possibilities of using these concepts in their own research. Given the timing of this publication, it has great potential value to the wider tourism community in advancing theory and leading to more effective empirical research. New Research Paradigms in Tourism Geography Alan A. Lew, 2017-10-02 This collection of papers from Tourism

Geographies emphasizes new and emerging research paradigms in the geographic study of tourism. The papers included in this collection follow one of two threads explicitly supporting specific research frameworks or implicitly presenting new and emerging theoretical perspectives through empirical research on the geographical topics. These begin with three overview papers from themes that emerged from recent annual meetings of the Association of American Geographers including evolutionary economic geography, EEG, political ecology and community resilience. Each of these theoretical and conceptual frameworks is leading to new explorations and insights in a wide variety of geographical and social science research including tourism studies. These are followed by a series of papers that extend our knowledge and thinking on a range of key geographical topics including development and underdevelopment by Saarinen, Rogerson, sustainable tourism planning by Torres Delgado, Saarinen, encounters with the natural environment by Hill, and the geography of place names by Light, as well as economic geography and new technologies and their applications to spatial behavior research. The papers in this special issue are especially relevant to tourism scholars and very much represent the types of perspectives that *Tourism Geographies* seek to promote. This book was published as a special issue of *Tourism Geographies*.
