ECRM2014-Proceedings of the 13th European Conference on Research Methodology for Business and Management Studies Dr Martin Rich, Dr Anne Brown, 2014-06-16 **Opportunities and Challenges for Tourism and Hospitality in the BRIC Nations** Dhiman, Mohinder Chand, 2016-09-06 The stability and wealth of a nation's economy is dependent upon the success of various industrial sectors. The tourism industry has experienced massive growth in recent years, creating more jobs and becoming a source of foreign exchange. *Opportunities and Challenges for Tourism and Hospitality in the BRIC Nations* is a pivotal reference source for the latest scholarly research on the recent developments and contemporary issues within the services sector, highlighting cross-cultural implications as well as societal impacts of hospitality and tourism on emerging markets. Providing insight on managing and maximizing profitability, this book is ideally designed for researchers, professionals, upper-level students, and academicians involved in the services industry. **Water Footprints and Sustainable Development** Suhaib A. Bandh, Fayaz A. Malla, 2024-08-09 *Water Footprints and Sustainable Development* serves as the sole comprehensive volume of the role of waste management for sustainable development. It provides an overview of the Global Scenario of water footprints in water-smart cities and technologies and investigates the critical factors that enable the sustainable developments of various industries in respect to water resources management. The goal of this book is to introduce the reader to the current technologies used for reducing water footprints and to offer the necessary information and tools for sustainable development. Provides detailed coverage of the role of Water, Energy, and Food Nexus with respect to sustainability. Covers methods such as lifecycle assessment, sustainability assessment, multi-criteria decision making, and multi-objective optimization modes. Includes key techniques for water resources management and sustainable development. **The Blue Compendium** Jane Lubchenco, Peter M. Haugan, 2023-05-24 Home to over 80 percent of all life on Earth, the ocean is the world's largest carbon sink and a key source of food and economic security for billions of people. The relevance of the ocean for humanity's future is undisputed. However, the ocean's great potential to drive economic growth and equitable job creation, sustain healthy ecosystems, and mitigate climate change is not yet fully recognised. Lack of awareness of this potential, as well as management and governance challenges, pose impediments. Until these impediments are removed, ocean ecosystems will continue to be degraded, and opportunities for people lost. A transition and a clear path to a thriving and vibrant relationship between humans and the ocean are urgently needed. This open-access collection of papers and reports identifies a path that is inspired by science, energised by engaged people, and emboldened by visionary leaders. These assessments of knowledge are commissioned by the High Level Panel for a Sustainable Ocean Economy (Ocean Panel), which was established in September 2018 as a unique initiative led by heads of state and government from around the world to showcase the latest leading-edge science knowledge and state-of-the-art thinking on key ocean issues. Altogether, *The Blue Compendium* offers innovative ocean solutions in technology, policy, governance, and finance.

realms that could help accelerate a transition to a more sustainable and prosperous relationship with the ocean The comprehensive assessments have already informed policy making at the highest levels of government and motivated an impressive array of responsive and ambitious action across a growing network of leaders in business finance and civil society

Textiles, Identity and Innovation: In Touch Gianni Montagna,Manuela Cristina Paulo Carvalho Figueiredo,2020-05-19 D_Tex is proposed as a hub around which it is possible to look at textiles in their different forms in order to better understand study adapt and project them for the future It is intended to build a flow of ideas and concepts so that participants can arrive at new ideas and concepts and work them in their own way adapting them to their objectives and research D_Tex is intended as a space for sharing and building knowledge around textile material in order to propose new understandings and explorations Present in all areas of knowledge the textile material bets on renewed social readings and its evolutions to constantly reinvent itself and enable innovative cultural and aesthetic dimensions and unexpected applications to solve questions and promote new knowledge D_Tex proposes to promote discussion and knowledge in the different areas where textiles with all their characteristics can ensure an important contribution combining material and immaterial knowledge innovative and traditional techniques technological and innovative materials and methods but also new organization and service models different concepts and views on teaching With the renewed idea of the intrinsic interdisciplinarity of design and sharing with different areas that support each other the research and practice of textiles was proposed by the D_TEX Textile Design Conference 2019 held June 19 21 2019 at the Lisbon School of Architecture of the University of Lisbon Portugal under the theme In Touch where as broadly understood as possible different areas of textiles were regarded as needing to keep in touch with each other and end users in order to promote and share the best they can offer for the welfare of their users and consumers

Analytical Methods in Petroleum Upstream Applications Cesar Ovalles,Carl E. Rechsteiner Jr.,2015-04-02 Effective measurement of the composition and properties of petroleum is essential for its exploration production and refining however new technologies and methodologies are not adequately documented in much of the current literature Analytical Methods in Petroleum Upstream Applications explores advances in the analytical methods and instrumentation that allow more accurate determination of the components classes of compounds properties and features of petroleum and its fractions Recognized experts explore a host of topics including A petroleum molecular composition continuity model as a context for other analytical measurements A modern modular sampling system for use in the lab or the process area to collect and control samples for subsequent analysis The importance of oil in water measurements and monitoring The chemical and physical properties of heavy oils their fractions and products from their upgrading Analytical measurements using gas chromatography and nuclear magnetic resonance NMR applications Asphaltene and heavy ends analysis Chemometrics and modeling approaches for understanding petroleum composition and properties to improve upstream midstream and downstream operations Due to the renaissance of gas and oil production in

North America interest has grown in analytical methods for a wide range of applications The understanding provided in this text is designed to help chemists geologists and chemical and petroleum engineers make more accurate estimates of the crude value to specific refinery configurations providing insight into optimum development and extraction schemes
